References with (L) are Letters to the Editor

Absorption Spectra, Infrared

Carbonyl stretching frequencies of some partially fluorinated esters, Jack Radell and Larry A. Harrah—1571

Coupled anharmonic vibrations and spectral line broadening, Robert M. Mazo—1893

Cyanide stretching vibrations of $[Co(CN)_6]^{-3}$ ion dissolved in solid KCl or NaCl, Llewellyn H. Jones—1400(L)

Electron spin resonance absorption and other properties of some solid hydrocarbon–quinone complexes, John W. Eastman, Gaylord M. Androes, and Melvin Calvin—1197

Erratum: Vibrational spectra of inorganic molecules. II. Infrared reflection spectra of liquid lithium, sodium, potassium and silver nitrates [J. Chem. Phys. **35**, 1078 (1961)], J. K. Wilmshurst and S. Senderoff—1088(L)

Experimental determination of the heat of dissociation of $N_2O_4 \rightarrow 2NO_2$ from the temperature dependence of absolute infrared intensities, A. Guttman and S. S. Penner—98

Far infrared spectra of solid methyl halides, Walter J. Lafferty and Dean W. Robinson—83

Infrared absorption by carbon monoxide at high temperature, William O. Davies—292

Infrared absorption of nonequivalent anions in crystalline potassium dithionate, K. Buijs—861(L)

Infrared absorption of some hexagonal rare-earth chlorides, F. Varsanyi and G. H. Dieke—835

Infrared absorption of zinc oxide and of adsorbed CO_2. II, Sanjuro Matsushita and Toshiko Nakata—665

Infrared absorption spectra of LiOH and LiOD, R. A. Buchanan, E. L. Kinsey, and H. H. Caspers—2665

Infrared spectra and dipole moments of $Rh_2(CO)_4Cl_2$ and $Rh_2(CO)_4Br_2$, C. W. Garland and J. R. Wilt—1094(L)

Infrared spectra and structure of the crystalline phases of CH_4 and CD_4, George B. Savitsky and D. F. Hornig—2634

Infrared spectra and vibrational assignments for *cis* and *trans* 1,2-difluoroethylenes: HFC=CFH, HFC=CFD, and DFC=CFD, Norman C. Craig and Eric A. Entemann—243

Infrared spectra in polarized light and vibrational assignment of the infrared active modes of anthracene and anthracene-d_{10}, S. Califano—903

Infrared spectra of ammonia suspended in solid nitrogen, George C. Pimentel, Mikhail O. Bulanin, and Mathias Van Thiel—500

Infrared spectra of crystalline C_2H_4 and C_2D_4, David A. Dows—2833

Infrared spectra of gaseous transition metal dihalides, George E. Leroi, Thomas C. James, Jon T. Hougen, and William Klemperer—2879

Infrared spectra of metal chelate compounds. VI. A normal coordinate treatment of oxalato metal complexes, Junnosuke Fujita, Arthur E. Martell, and Kazuo Nakamoto—324

Infrared spectra of metal chelate compounds. VII. Normal coordinate treatments on 1:2 and 1:3 oxalato complexes, Junnosuke Fujita, Arthur E. Martell, and Kazuo Nakamoto—331

Infrared spectra of metal chelate compounds. VIII. Infrared spectra of Co(III) carbonato complexes, Junnosuke Fujita, Arthur E. Martell, and Kazuo Nakamoto—339

Infrared spectra of the group II halides: Zinc halides and the ionic model, Alfred Büchler, William Klemperer, and Alfred G. Emslie—2499

Infrared spectrum and thermodynamic properties of gaseous sulfur trioxide, R. W. Lovejoy, J. H. Colwell, D. F. Eggers, Jr., and G. D. Halsey, Jr.—612

Infrared spectrum of CO chemisorbed on iron, George Blyholder—2036

Infrared studies of crystal benzene. V. Reflection spectrum and absolute intensities, George R. Anderson, and Willis B. Person—62

Infrared studies of nitriles as proton acceptors in hydrogen bond formation, Shashanka S. Mitra—3286

Intensities of vibrational and rotational spectra of charged diatomic molecules, Frank O. Ellison—478

Intensity of the ν_2 infrared band of methane, J. Herranz—173

Intermolecular coupling of vibrations in molecular crystals. III. Intermolecular potential and crystal structure of ethylene, David A. Dows—2836

Interpretation of the ultraviolet spectrum of oxalyl chloride, B. D. Saksena and G. S. Jauhri—2233(L)

Lattice frequencies and rotational barriers for inorganic carbonates and nitrates, R. A. Schroeder, C. E. Weir, and E. R. Lippincott—2803(L)

Low-frequency fundamentals of some metal carbonyls, Robin S. McDowell and Llewellyn H. Jones—3321

Modified Urey–Bradley force-field for condensed aromatic rings, James R. Scherer—3304

Motions of molecules in condensed systems: XII. The infrared spectrum and structure of a single crystal of allene, Joseph Blanc, Charles Brecher, and Ralph S. Halford—2654

O–H–O and O–D–O potential energy curves for chromous acid, Robert G. Snyder and James A. Ibers—1356

Optically active lattice vibrations of α-uranium trioxide, Masamichi Tsuboi, Minoru Terada, and Takehiko Shimanouchi—1301

Relations among vibrational frequencies of isotopically substituted molecules and the determination of force constants, Julian Heicklen—721

Rotation of physically adsorbed CO, George Blyholder and Laurence Neff—3503(L)

Solid-state vibrational spectra of ethylene and ethylene-d_4, Marilyn E. Jacox—140

Spectroscopy in liquid rare-gas solvents. The infrared spectra of CH_4 in argon and of HCl in xenon, Joel Kwok and G. Wilse Robinson—3137

Studies of hydrogen peroxide: The infrared spectrum and the internal rotation problem, R. L. Redington, W. B. Olson, and P. C. Cross—1311

Suggestion for the j-dependence of some of the results of Jaffe and co-workers, Robert Englman—3417

Temperature dependence of pressure-induced shifts of HCl lines due to xenon, J. H. Jaffe, A. Landau, and A. Ben-Reuven—1946(L)

VCl_4 vapor spectrum and Jahn–Teller splitting, Floyd A. Blankenship and R. Linn Belford—633

Vibration-rotation spectra of BrCN, Arthur G. Maki and C. Thomas Gott—2282

Vibrational spectra of inorganic molecules. IV. The infrared reflection spectra of liquid lithium, sodium, potassium and

silver chlorates and liquid lithium perchlorate, J. K. Wilmshurst—2415
Vibrational spectra of MoF_6 and TcF_6, Howard H. Claassen, Henry Selig, and John G. Malm—2888
Vibrational spectra of ReF_6, Howard H. Claassen, John G. Malm, and Henry Selig—2890
Vibrational spectrum and force constants for molybdenum hexacarbonyl, Llewellyn H. Jones—2375
Vibrational spectrum and structure of single crystals of $K_3Co(CN)_6$, Llewellyn H. Jones—1209

Absorption Spectra, Microwave

Centrifugal stretching of $CClF_3$ and some other symmetric tops, R. C. Johnson, Quitman Williams, and T. L. Weatherly—1588
Collision-induced microwave absorption in compressed gases. I. Dependence on density, temperature, and frequency in CO_2, A. A. Maryott and G. Birnbaum—2026
Collision-induced microwave absorption in compressed gases. II. Molecular electric quadrupole moments, G. Birnbaum and A. A. Maryott—2032
Dissociation of the hydroxyl radical in an RF discharge, David W. Howgate—239
Electron distribution in the C—Cl bonds of CH_2Cl_2 and derivation of matrix elements off-diagonal in J for two quadrupolar nuclei in an asymmetric rotor, W. H. Flygare and William D. Gwinn—787
Hyperfine structure of the rotational spectrum of HDO, E. B. Treacy and Yardley Beers—1473
Microwave absorption and molecular structure in liquids. XLV. The dispersion of alkyl halides at millimeter wavelengths, W. E. Vaughan, W. S. Lovell, and C. P. Smith—753
Microwave investigation of cyclopentene, George W. Rathjens, Jr.—2401
Microwave spectrum and quadrupole interaction in *cis*-1,2-dichloroethylene, W. H. Flygare and J. A. Howe—440
Microwave spectrum and structure of trichlorofluoromethane, J. H. N. Loubser—2808(L)
Microwave spectrum of bromocyclobutane, W. G. Rothschild and B. P. Dailey—2931
Microwave spectrum, structure, quadrupole coupling constants, and barrier to internal rotation of chloromethylsilane, R. H. Schwendeman and G. D. Jacobs—1251
Microwave spectrum, structure, quadrupole interaction, dipole moment, and bent C—Cl bonds in 1,1-dichlorocyclopropane, W. H. Flygare, A. Narath, and William D. Gwinn—200
Microwave structure determinations on tertiary butyl acetylene and tertiary butyl cyanide, Leonard J. Nugent, D. E. Mann, and David R. Lide, Jr.—965
Molecular structure of chloroform, May Jen and David R. Lide, Jr.—2525(L)
Molecular structure of ethyl chloride, R. H. Schwendeman and G. D. Jacobs—1245

Absorption Spectra, of Crystals

Absorption and fluorescence spectra of Pr^{3+} in $LaBr_3$, Eugene Y. Wong and Isaac Richman—1889
Absorption and self-luminescence spectra of $Cf^{3+}(5f^9)$, John G. Conway, John B. Gruber, E. Kenneth Hulet, Richard J. Morrow, and Ralph G. Gutmacher—189
Absorption spectra of the ferric iron-containing oxides, K. A. Wickersheim and R. A. Lefever—844
Absorption spectrum and Zeeman effect of Am^{3+} in $LaCl_3$, John B. Gruber and John G. Conway—191
Absorption spectrum of phenazine single crystals at 77° and 4.2°K in the region of the $n\rightarrow\pi^*$ transition, Robin M. Hochstrasser—1808
Comment on the letter of A. Gold and R. S. Knox, Paul H. E. Meijer—2806(L)
Crystal spectrum of chromium acetylaceonate and the ligand field in trigonal coordination compounds, T. S. Piper and R. L. Carlin—3330
Electron-optical phonon interaction for paramagnetic ions in crystalline fields, S. A. Pollack and R. A. Satten—804
Electronic spectrum of decaborane, Arne Haaland and W. H. Eberhardt—2386
Energy levels of hexagonal $ErCl_3$, F. Varsanyi and G. H. Dieke—2951
Erratum: Analysis of polarized crystal spectra. The spectrum of cobalt (III) acetylacetonate [J. Chem. Phys. **35**, 1240 (1961)], T. S. Piper—1089(L)
Erratum: Analysis of the spectra of trivalent promethium and holmium [J. Chem. Phys. **35**, 1392 (1961)], M. H. Crozier and W. A. Runciman—1088(L)
Far infrared spectra of solid methyl halides, Walter J. Lafferty and Dean W. Robinson—83
Formation of additive V centers in disks prepared from powdered alkali halides, Abraham Glasner and Lina Ben-Dor—2815
Infrared absorption of nonequivalent anions in crystalline potassium dithionate, K. Buijs—861(L)
Infrared absorption of some hexagonal rare-earth chlorides, F. Varsanyi and G. H. Dieke—835
Infrared absorption spectra of LiOH and LiOD, R. A. Buchanan, E. L. Kinsey, and H. H. Caspers—2665
Infrared spectra and structure of the crystalline phases of CH_4 and CD_4, George B. Savitsky and D. F. Hornig—2634
Infrared spectra in polarized light and vibrational assignment of the infrared active modes of anthracene and anthracene-d_{10}, S. Califano—903
Infrared studies of crystal benzene. V. Reflection spectrum and absolute intensities, George R. Anderson and Willis B. Person—62
Intensities and optical activity of trisoxalatometallates, T. S. Piper—2224(L)
Lattice frequencies and rotational barriers for inorganic carbonates and nitrates, R. A. Schroeder, C. E. Weir, and E. R. Lippincott—2803(L)
Line shape of ultraviolet absorption in crystalline rare gases, Albert Gold and Robert S. Knox—2805(L)
Mixed dimer emission from pyrene crystals containing perylene, Robin M. Hochstrasser—1099(L)
Motions of molecules in condensed systems. XII. The infrared spectrum and structure of a single crystal of allene, Joseph Blanc, Charles Brecher, and Ralph S. Halford—2654
On the optical spectra of some transition metal pentacyanonitrosyl complexes, Harry B. Gray and C. J. Ballhausen—1151
Optical spectra of Ni^{2+}, Co^{2+}, and Cu^{2+} in tetrahedral sites in crystals, Herbert A. Weakliem—2117
Optical spectra of transition-metal ions in corundum, Donald S. McClure—2757

Optically active lattice vibrations of α-uranium trioxide, Masamichi Tsuboi, Minoru Terada, and Takehiko Shimanouchi—1301

Polarization of the spectra of crystalline azobenzene and mixed crystals of azobenzene in stilbene at 77° and 4.2°K in the region of the lowest $n\rightarrow\pi^*$ transition, Robin M. Hochstrasser and Stephen K. Lower—3505(L)

Solid-state vibrational spectra of ethylene and ethylene-d_4, Marilyn E. Jacox—140

Spectrum of UCl_4, Ralph McLaughlin—2699

Ultraviolet spectra of stilbene, *p*-monohalogen stilbenes, and azobenzene and the *trans* to *cis* photoisomerization process, Rudolph H. Dyck and Donald S. McClure—2326

Vibrational excitons. II. Degenerate vibrations, R. M. Hexter—2285

Vibrational spectrum and structure of single crystals of $K_3Co(CN)_6$, Llewellyn H. Jones—1209

Absorption Spectra, Visible or Ultraviolet

Absorption and fluorescence spectra of Pr^{+3} in $LaBr_3$, Eugene Y. Wong and Isaac Richman—1889

Absorption and photoionization coefficients of propylene and butene-1 in the vacuum ultraviolet, J. A. R. Samson, F. F. Marmo, and K. Watanabe—783

Absorption and self-luminescence spectra of $Cf^{3+}(5f^9)$, John G. Conway, John B. Gruber, E. Kenneth Hulet, Richard J. Morrow, and Ralph G. Gutmacher—189

Absorption coefficients of sulfur dioxide in the vacuum ultraviolet, D. Golomb, K. Watanabe, and F. F. Marmo—958

Absorption spectra of the ferric iron-containing oxides, K. A. Wickersheim and R. A. Lefever—844

Absorption spectrum and Zeeman effect of Am^{+3} in $LaCl_3$, John B. Gruber and John G. Conway—191

Absorption spectrum of CF_2 trapped in an argon matrix, Arnold M. Bass and D. E. Mann—3501(L)

Absorption spectrum of phenazine single crystals at 77° and 4.2°K in the region of the $n\rightarrow\pi^*$ transition, Robin M. Hochstrasser—1808

Assignment of electronic transitions in azo dye prototypes, Melvin B. Robin and William T. Simpson—580

Calculation of *p*-band positions of aromatic polycyclic hydrocarbons by limited configuration interaction method, J. Koutecký, J. Paldus, and R. Zahradník—3129

Comment on the letter of A. Gold and R. S. Knox, Paul H. E. Meijer—2806(L)

Comparison of localized and delocalized models for $n\rightarrow\pi^*$ transitions: A possible interpretation of the observed symtetrazine fluorescence, M. Ashraf El-Bayoumi and David R. Kearns—2516(L)

Crystal spectrum of chromium acetylaceonate and the ligand field in trigonal coordination compounds, T. S. Piper and R. L. Carlin—3330

Dipole moments of excited electronic states: Possible values for CO and CO^+, Raoul Kopelman and William Klemperer—1693(L)

Effect of film thickness and substrate on the absorption spectrum of solid lead chloride, W. P. Doyle and D. B. Pearson—1950(L)

Effect of oxygen on the ultraviolet spectra of benzene, E. C. Lim and V. L. Kowalski—1729

Effect of reducing the symmetry on the spectra of benzene in the 1500–2000 Δ region: Spectra of pyridine, pyrimidine, and pyrazine, M. A. El-Sayed—552(L)

Electrochromism (Stark effect) in solids due to isolated absorbing centers, J. Kumamoto, J. C. Powers, Jr., and W. R. Heller 2893

Electron-optical phonon interaction for paramagnetic ions in crystalline fields, S. A. Pollack and R. A. Satten—804

Electron spin resonance absorption and other properties of some solid hydrocarbon–quinone complexes, John W. Eastman, Gaylord M. Androes, and Melvin Calvin—1197

Electronic spectra of naphthols, Kichisuke Nishimoto and Ryoichi Fujishiro—3494(L)

Electronic spectrum of adsorbed benzene, A. Ron, M. Folman, and O. Schnepp—2449

Electronic spectrum of decaborane, Arne Haaland and W. H. Eberhardt—2386

Energy levels of hexagonal $ErCl_3$, F. Varsanyi and G. H. Dieke—2951

Equivalence of Rydberg–Klein–Rees and simplified Dunham potentials, A. C. Hurley—1117(L)

Erratum: Analysis of polarized crystal spectra. The spectrum of cobalt (III) acetylacetonate [J. Chem. Phys. **35**, 1240 (1961)], T. S. Piper—1089(L)

Erratum: Analysis of the spectra of trivalent promethium and holmium [J. Chem. Phys. **35**, 1392 (1961)], M. H. Crozier and W. A. Runciman—1088(L)

Experimental oscillator strength of the violet system of CN, R. G. Bennett and F. W. Dalby—399

Formation of additive *V* centers in disks prepared from powdered alkali halides, Abraham Glasner and Lina Ben-Dor—2815

Higher ionization potentials of NO_2, Y. Tanaka and A. S. Jursa—2493

Identity of chemical and photochemical species from gamma-(2,4-dinitrobenzyl) pyridine, R. Hardwick and Harry S. Mosher—1402(L)

Infrared spectra of crystalline C_2H_4 and C_2D_4, David A. Dows—2833

Intensities and optical activity of trisoxalatometallates, T. S. Piper—2224(L)

Intermolecular coupling of vibrations in molecular crystals. III. Intermolecular potential and crystal structure of ethylene, David A. Dows—2836

Intermolecular proton transfer in the excited hydrogen-bonded complex in nonpolar solvent and fluorescence quenching due to hydrogen bonding, Noboru Mataga and Yozo Kaifu—2804(L)

Interpretation of the ultraviolet spectrum of oxalyl chloride, B. D. Saksena and G. S. Jauhri—2233(L)

Ionization differences between coordination states of a cation. Octahedral-tetrahedral equilibrium of transition element chlorides in dimethylformamide, Leonard I. Katzin—3034

Line shape of ultraviolet absorption in crystalline rare gases, Albert Gold and Robert S. Knox—2805(L)

Low-temperature solution spectra of methylcyclohexane benzene. Effect of oxygen and carbon tetrachloride, Hiroshi Tsubomura and Robert P. Lang—2155

Mixed dimer emission from pyrene crystals containing perylene, Robin M. Hochstrasser—1099(L)

Near-ultraviolet absorption spectrum of tetrolaldehyde, J. S. Muirhead and J. A. Howe—2316

Observation of anomalous phosphorescence–fluorescence intensity ratio in excitation of upper electronic states of certain aromatic hydrocarbons, M. F. O'Dwyer, M. Ashraf El-Bayoumi, and S. J. Strickler—1395(L)

On the determination of absolute intensities from refractive index data, Shiro Maeda and P. N. Schatz—571(L)
On the optical spectra of some transition metal pentacyanonitrosyl complexes, Harry B. Gray and C. J. Ballhausen—1151
Optical spectra of Ni^{2+}, Co^{2+}, and Cu^{2+} in tetrahedral sites in crystals, Herbert A. Weakliem—2117
Optical spectra of transition-metal ions in corundum, Donald S. McClure—2757
Perturbational enhancement of the coupling between the lowest two electronic π, π^* states in naphthalene, M. A. El-Sayed—1943(L)
Polarization of the spectra of crystalline azobenzene and mixed crystals of azobenzene in stilbene at 77° and 4.2°K in the region of the lowest $n \rightarrow \pi^*$ transition, Robin M. Hochstrasser and Stephen K. Lower—3505(L)
Radiationless transitions and radiative lifetime of $^3B_{1u}$ state of benzene, E. C. Lim—3497(L)
Semiconductive properties of tetracyanoethylene complexes and their absorption spectra, H. Kuroda, M. Kobayashi, M. Kinoshita, and S. Takemoto—457
Spectrum of C_3, Leo Brewer and John L. Engelke—992
Spectrum of UCl_4, Ralph McLaughlin—2699
Spin-forbidden transition of NO observed in solution spectra, T. S. Piper and Russell S. Drago—241
Structure of the triplet bands of CO, P. K. Carroll—2861
The use of a pseudopotential in color center calculations, J. D. Patterson—423
Theory of magnetic rotation spectra, H. F. Hameka—2540
Thermal bleaching of Cl_2^- centers, Theodore J. Neubert and John A. Reffner—2780
Ultraviolet bands of magnesium hydroxide and oxide, Leo Brewer and Sandor Trajmar—1585
Ultraviolet spectra of stilbene, *p*-monohalogen stilbenes, and azobenzene and the *trans* to *cis* photoisomerization process, Rudolph H. Dyck and Donald S. McClure—2326
Vacuum ultraviolet absorption spectra of 1,4-dioxane and 1,3-dioxane, G. J. Hernandez and A. B. F. Duncan—1504
VCl_4 vapor spectrum and Jahn-Teller splitting, Floyd A. Blankenship and R. Linn Belford—633
Vibrational distribution in evaporating iodine, Robert L. Brown, Richard G. Brewer, and William Klemperer—1827

Announcements

Announcement—3506

Adsorption (see Surface Phenomena)

Beams, Atomic and Molecular

Evaluation of the intermolecular potential well depth from observations of rainbow scattering: Cs–Hg and K–Hg, Fred A. Morse, R. B. Bernstein, and H. U. Hostettler—1947(L)
Ionizing collisions of metastable helium atoms in gases, W. P. Sholette and E. E. Muschlitz, Jr.—3368
Redetermination of the He–He interaction between 0.55 and 1.0 A, I. Amdur and R. R. Bertrand—1078(L)
Semiclassical equivalence relationship applied to the calculation of molecular beam scattering phase shifts, Richard B. Bernstein—1403(L)
Spin relaxation in optical pumping, Robert A. Bernheim—135
WKB approximation and molecular beam scattering, R. P. Marchi and C. R. Mueller—1100(L)

Catalysis

On the applicability of the Temkin–Pyzhev equation for the determination of activation energies of ammonia synthesis at one atmosphere pressure, R. Brill and S. Tauster—2100

Chemical Reactions (see Kinetics of Reactions)

Conductance

Determination of the electronic conductivity and the transference numbers of ions and electrons in solid TlBr, A. Morkel and H. Schmalzried—3101(L)
Electrical conductivity of proteins. II. Semiconduction in crystalline bovine hemoglobin, Barnett Rosenberg—816
Electronic and ionic conductivity in single crystals of MgO, S. P. Mitoff—1383
Photocarrier generation in anthracene, D. C. Hoesterey—557(L)

Crystal Growth

Composition stability limits of PbTe. II, R. F. Brebrick and E. Gubner—1283
Nucleation of zinc on glass, John B. Hudson—887

Crystalline State

An analysis of paramagnetic resonance properties of pure and bleached *F* centers in potassium chloride, Gordon A. Noble and Jordan J. Markham—1340
Deuteron magnetic resonance study of several deuterated ammonium salts, Takehiko Chiba—1122
Double-minimum potentials in hydrogen bonded solids, R. L. Somorjai and D. F. Hornig—1980
Electronic and ionic conductivity in single crystals of MgO, S. P. Mitoff—1383
Enhancement of Eu^{3+} emission by Tb^{3+}, L. G. Van Uitert and R. R. Soden—1289
Enhancement of rare-earth ion fluorescence by lattice processes in oxides, L. G. Van Uitert, R. R. Soden, and R. C. Linares—1793
Enthalpy of formation of oxygen vacancies in barium oxide, H. Holloway—2820
Erratum: Band structure and transport of holes and electrons in anthracene [J. Chem. Phys. **35**, 1275 (1961)], Oliver H. LeBlanc, Jr.—1082(L)
Formation of additive *V* centers in disks prepared from powdered alkali halides, Abraham Glasner and Lina Ben-Dor—2815
Heat capacity and entropy of $CoCl_2$ and $MnCl_2$ from 11° to 300°K. Thermal anomaly associated with antiferromagnetic ordering in $CoCl_2$, R. C. Chisholm and J. W. Stout—972
Heat capacity and entropy of $CuCl_2$ and $CrCl_2$ from 11° to 300°K. Magnetic ordering in linear chain crystals, J. W. Stout and R. C. Chisholm—979
Infrared spectra in polarized light and vibrational assignment of the infrared active modes of anthracene and anthracene-d_{10}, S. Califano—903
Infrared study of the reaction of CH_2 with CO_2 in the solid state, Dolphus E. Milligan and Marilyn E. Jacox—2911

Interaction of 0.2–4.0-ev electron beams with cleaved MgO, C. J. Cook and W. J. Fredericks—608
Intermolecular bonding in the solid halogens, R. Bersohn—3445
Interpair nuclear magnetic relaxation in hydrated crystals, D. F. Holcomb and B. Pedersen—3270
Kronig-structure variations in the x-ray *K*-absorption spectra of a Cu single crystal, T. A. Boster and J. E. Edwards—3031
Ligand field splitting of *d* orbitals in eight coordinated complexes of dodecahedral structure, Milan Randić—2094
Local approximation method in the treatment of anharmonic crystals, Thomas H. Walnut—158
Mobility of bromine vacancies in KBr single crystals, G. Jacobs, L. G. Vandewiele, and A. Hamerlinck—2946
Molecular rotation in rare-gas crystals, Robert L. Armstrong—2429
Note on Magee-Funabashi's theory of excitation migration, Mitio Inokuti—2663
Nuclear magnetic resonance spectrum of B^{11} in lesserite, K. S. Pennington and H. E. Petch—2151
Optical spectra of transition-metal ions in corundum, Donald S. McClure—2757
Optically active lattice vibrations of α-uranium trioxide, Masamichi Tsuboi, Minoru Terada, and Takehiko Shimanouchi—1301
Paramagnetic excitons in solid free radicals, Harden M. McConnell and Ruth Lynden-Bell—2393
Phonon-frequency distribution curve of vanadium on deLaunay's model, B. Sharan—1116(L)
Preparation of semiconducting cubic boron nitride, R. H. Wentorf, Jr.—1990
Preparation of semiconducting diamonds, R. H. Wentorf, Jr. and H. P. Bovenkerk—1987
Proton magnetic resonance studies of polycrystalline uranium oxide-hydrates. I. β-$UO_3 2H_2O$, A. L. Porte, H. S. Gutowsky, and J. E. Boggs—1695
Proton magnetic resonance studies of polycrystalline uranium oxide-hydrates. II. β-UO_3H_2O, A. L. Porte, H. S. Gutowsky, and J. E. Boggs—1700
Quadrupolar study of barium in barium bromide dihydrate by proton magnetic resonance, J. W. McGrath and A. A. Silvidi—1496
Spin exchange between excitons and free radicals, H. M. McConnell, H. O. Griffith, and D. Pooley—2518(L)
Symmetry of configurational entropy in lattice statistics, W. H. Kleiner—76
Thermal bleaching of Cl_3^- centers, Theodore J. Neubert and John A. Reffner—2780
Thermodynamics of the formation and migration of defects in cuprous oxide, Michael O'Keeffe and Walter J. Moore—3009
Thermoluminescence of solid nitrogen after electron bombardment at 4.2°K, Brian Brocklehurst and George C. Pimentel—2040
Ultimate strength of crystals, G. W. Sears—862(L)
Vibrational excitons II. Degenerate vibrations, R. M. Hexter—2285
Vibrational structure of molecular exciton states, R. E. Merrifield—2519(L)

Crystal Structure

Crystal and magnetic structure of cupric fluoride dihydrate at 4.2°K, S. C. Abrahams—56
Crystal and molecular structure of triethylscarphane, T. N. Margulis and David H. Templeton—2311
Crystal structure of bismuth monochloride, Alex Hershaft and John D. Corbett—551(L)
Crystal structure of cupric fluoride dihydrate at 298°K, S. C. Abrahams and E. Prince—50
Molecular symmetry of IF_7, L. L. Lohr, Jr., and William N. Lipscomb—2225(L)
Proton magnetic resonance studies on hexamethylenetetramine—structure, molecular reorientation, and impurity diffusion, George W. Smith—3081
Quadrupolar study of barium in barium bromide dihydrate by proton magnetic resonance, J. W. McGrath and A. A. Silvidi—1496
Some properties of bismuth perovskites, Carl F. Buhrer—798
Structure of the hydrogen-bonded water molecule in crystals, R. Chidambaram—2361

Detonation (see also Shock Waves)

Detonation sensitivity and failure diameter in homogeneous condensed materials, Marjorie W. Evans—193
Effect of reactor length on the formation of detonation in saturated knallgas-steam mixtures, James A. Luker and Leonard B. Adler—718
Initiation of explosions by hot spots, John Zinn—1949(L)
Structure of detonation waves in gases, B. Levitt and D. F. Hornig—219

Deuterium (see Isotopes)

Dielectrics

Collision-induced microwave absorption in compressed gases. I. Dependence on density, temperature, and frequency in CO_2, A. A. Maryott and G. Birnbaum—2026
Collision-induced microwave absorption in compressed gases. II. Molecular electric quadrupole moments, G. Birnbaum and A. A. Maryott—2032
Dielectric behavior of water adsorbed on alumina, Mart G. Baldwin and J. C. Morrow—1591
Dielectric constants of imperfect gases. II. Carbon dioxide and ethylene, D. R. Johnston and R. H. Cole—318
Dielectric loss in "nonpolar" polymers, Alexander J. Curtis—3500(L)
Dielectric relaxation in liquid alcohols and diols, Matthew W. Sagal—2437
Dielectric relaxation of nonrigid molecules at lower temperature, Akio Matsumoto and Keniti Higasi—1776
Dielectric relaxation of water adsorbed on γ-alumina, Klaus Dransfeld, H. L. Frisch, and E. A. Wood—1574
Dielectric saturation and hydrogen bonding, A. Piekara—2145
Dielectric saturation in aliphatic alcohols, J. Malecki—2144
Dielectric studies of the polymer polyvinyl acetate in the molten state, J. K. Hartt and E. F. Carr—2523(L)
Elementary derivation of the dielectric constant of an imperfect gas, Allan N. Kaufman and Kenneth M. Watson—439
Erratum and addendum: Atomic polarization. IV. Temperature dependence of the vibrational polarization of gases [J. Chem. Phys. **35**, 400(1961)], Karl H. Illinger—1084(L)
Infrared spectra and dipole moments of $Rh_2(CO)_4Cl_2$ and $Rh_2(CO)_4Br_2$, C. W. Garland and J. R. Wilt—1094(L)

Microwave absorption and molecular structure in liquids. XLIV. Investigation of dielectric relaxation by an interferometric method for the measurement of dielectric constant and loss at 2.2-mm wavelength, W. E. Vaughan, W. S. Lovell, and C. P. Smyth—535
Microwave investigation of cyclopentene, George W. Rathjens, Jr.—2401
Microwave spectrum, structure, quadrupole interaction, dipole moment, and bent C—Cl bonds in 1,1-dichlorocyclopropane, W. H. Flygare, A. Narath, and William D. Gwinn—200
Mobility of bromine vacancies in KBr single crystals, G. Jacobs, L. G. Vandewiele, and A. Hamerlinck—2946
Some properties of bismuth perovskites, Carl F. Buhrer—798
Statistical theory of dielectric fluids, A. Isihara and Russell V. Hanks—433

Diffusion

Diffusion and equilibrium in two-phase binary liquid systems, K. J. Reid—559(L)
Diffusion kinetics in radiation chemistry. I. Generalized formulation and criticism of diffusion model, Aron Kuppermann and Geneva G. Belford—1412
Diffusion kinetics in radiation chemistry. II. One-radical-one-solute model; calculations, Aron Kuppermann and Geneva G. Belford—1427
Diffusion of hydrogen and deuterium in fused quartz, R. W. Lee, R. C. Frank, and D. E. Swets—1062
Diffusion of hydrogen in the γ phase of titanium hydride, C. K. Coogan and H. S. Gutowsky—110
Diffusion of transition metal ions in single-crystal MgO, B. J. Wuensch and T. Vasilos—2917
Estimation of the mutual diffusion coefficient of hydrogen atoms and molecules, Stanley Weissman and E. A. Mason—794
Gaseous diffusion in porous media. II. Effect of pressure gradients, R. B. Evans III, G. M. Watson, and E. A. Mason—1894
Kinetic theory of dense fluids. X. Measurement and interpretation of self-diffusion in liquid Ar, Kr, Xe, and CH_4, Jamshid Naghizadeh and Stuart A. Rice—2710
Molecular diffusion studies in gases at high temperature. V. Results for the H_2–Ar system, A. A. Westenberg and G. Frazier—3499(L)
NMR measurements of self-diffusion in normal hydrogen gas from 55° to 90°K, Max Lipsicas—1235
Nuclear magnetic resonance study of the diffusion of hydrogen in zirconium hydride, J. F. Hon—759
On the self-diffusion of ions in a polyelectrolyte solution, Shneior Lifson and Julius L. Jackson—2410
Proton magnetic resonance studies on hexamethylenetetramine-structure, molecular reorientation, and impurity diffusion, George W. Smith—3081
Self-diffusion in liquid tin, C. H. Ma and R. A. Swalin—3014
Self-diffusion of lead-210 in single crystals of lead selenide, Martin S. Seltzer and J. Bruce Wagner, Jr.—130
Studies on mutual diffusion of polar–nonpolar gas mixtures, B. N. Srivastava and I. B. Srivastava—2616

Dipole Moment

Infrared spectra and dipole moments of $Rh_2(CO)_4Cl_2$ and $Rh_2(CO)_4Br_2$, C. W. Garland and J. R. Wilt—1094(L)
Microwave spectrum, structure, quadrupole interaction, dipole moment, and bent C—Cl bonds in 1,1-dichlorocyclopropane, W. H. Flygare, A. Narath, and William D. Gwinn—200
Structure and dipole moment for SF_4, W. M. Tolles and William D. Gwinn—1119

Effusion

Effect of channel length on the force exerted by effusing vapors, David A. Schulz and Alan W. Searcy—3099(L)

Elasticity

Electrical Properties

Charge injection into organic crystals: Influence of electrodes on dark- and photoconductivity, Martin Pope, Hartmut P. Kallmann, Augustine Chen, and Peter Gordon—2486
Determination of the electronic conductivity and the transference numbers of ions and electrons in solid TlBr, A. Morkel and H. Schmalzried—3101(L)
Effect of adsorbed phases on the electrical conductivity of synthetic crystalline zeolites, Dennis N. Stamires—3174
Electrical properties of chlorpromazine, F. Gutmann and A. Netschey—2355
Electrical properties of some dilute sodium tungsten bronzes, William McNeill and Lawrence E. Conroy—87
Electrical resistance of alpha hydrogen–palladium, W. T. Lindsay, Jr. and F. W. Pement—1229
Electron conduction in charge-transfer molecular crystals, E. Menefee and Yoh-Han Pao—3472
Electronic and ionic conductivity in single crystals of MgO, S. P. Mitoff—1383
Electronic properties of polysulfur nitride, Paul L. Kronick, Howard Kaye, Ernest F. Chapman, Shashikant B. Mainthia, and Mortimer M. Labes—2235(L)
Erratum: Band structure and transport of holes and electrons in anthracene [J. Chem. Phys. **35,** 1275 (1961)], Oliver H. LeBlanc, Jr.—1082(L)
Semiconductive properties of tetracyano-ethylene complexes and their absorption spectra, H. Kuroda, M. Kobayashi, M. Kinoshita, and S. Takemoto—457
Semiconductivity of naphthalene, John A. Bornmann—1691(L)
Surface ionization energies of organic compounds: Phthalocyanines, Martin Pope—2810(L)
Theory of hole injection and conductivity in organic materials, Hartmut P. Kallmann and Martin Pope—2482
Tunneling model for electron transport and its temperature dependence in crystals of low carrier mobility. Example: anthracene, R. A. Keller and H. E. Rast, Jr.—2640

Electrochemistry

Galvanostatic studies on fluorine evolution on carbon electrodes, A. J. Arvia and J. B. de Cusminsky—1089(L)
Nonequilibrium thermodynamics of the simple moving boundary experiment, Richard J. Bearman—2432
On the self-diffusion of ions in a polyelectrolyte solution, Shneior Lifson and Julius L. Jackson—2410
Second virial coefficients of polyelectrolytes. I, Norio Ise—3248

Theory of double layer differential capacitance in electrolytes, J. Ross Macdonald and Carl A. Barlow, Jr.—3062
Ultrasonic absorption in an electrolytic solution with a mixed solvent, S. S. Yun, R. T. Beyer, and M. W. Dill—2737

Electron Affinity

Attachment of low-energy electrons to oxygen, D. C. Conway—2549
Interaction energy of an alkali metal with a rare gas, Nivard Scheel and Virginia Griffing—1453
Negative atomic ions. II, J. W. Edie and F. Rohrlich—623

Electron Diffraction

Centrifugal distortion of bond distances and bond angles, Machio Iwasaki and Kenneth Hedberg—2961
Correction of electron diffraction data for failure of the Born approximation, R. A. Bonham and T. Ukaji—72
Determination of the molecular structures of CF_3NO_2 and CBr_3NO_2 by electron diffraction, I. L. Karle and J. Karle—1969
Effect of anharmonic vibrations on the bond lengths of polyatomic molecules. I. Model of force field and application to water, Kozo Kuchitsu and L. S. Bartell—2460
Effect of anharmonic vibrations on the bond lengths of polyatomic molecules. II. Cubic constants and equilibrium bond lengths of methane, Kozo Kuchitsu and L. S. Bartell—2470
Effect of temperature on the structure of gaseous molecules. The molecular structure of PCl_3 at 300° and 505°K, Kenneth Hedberg and Machio Iwasaki—589
Experimental f values and electron diffraction amplitudes for bromine, Harold P. Hanson—1043
Inelastic scattering from atoms at medium energies. I. Bound states, Russell A. Bonham—3260
Internuclear distance parameters, Yonezo Morino, Kozo Kuchitsu, and Takeshi Oka—1108(L)
Nitrogen on nickel surfaces, L. H. Germer and A. U. MacRae—1555
On secondary isotope effects in molecular structure, L. S. Bartell—3495(L)
Potential constants of PCl_3 from amplitudes of vibration and normal vibration frequencies, Machio Iwasaki and Kenneth Hedberg—594
Shrinkage effect by thermal vibrations in linear-skeleton molecules, Yonezo Morino, Junko Nakamura, and Peter W. Moore—1050
Shrinkage effect for nonlinear conformations, Y. Morino, S. J. Cyvin, K. Kuchitsu, and T. Iijima—1109(L)

Electron Microscopy

Ultimate strength of crystals, G. W. Sears—862(L)

Emission Spectra

Absorption and fluorescence spectra of Pr^{+3} in $LaBr_3$, Eugene Y. Wong and Isaac Richman—1889
Active nitrogen at high pressure, J. F. Noxon—926
Deactivation of $Hg(6^3P_1)$ by CO and N_2, Milton D. Scheer and Joseph Fine—1264
Double probe measurements of ionization in active nitrogen, H. P. Broida and Ikuzo Tanaka—236
Electrofluorescence of rare-earth activated Al_2O_3, I. Adams and J. W. Mellichamp—2456
Emission of vacuum ultraviolet radiation from the acetylene–oxygen and the methane–oxygen reactions in shock waves, G. B. Kistiakowsky and L. Willard Richards—1707
Emission spectrum of S_2 in the vacuum ultraviolet region, Y. Tanaka and M. Ogawa—726
Enhancement of Eu^{3+} emission by Tb^{3+}, L. G. Van Uitert and R. R. Soden—1289
Fluorescence of s-tetrazine, Mihir Chowdhury and Lionel Goodman—548(L)
Heat of sublimation and dissociation energy of gaseous C_2, Leo Brewer, W. T. Hicks, and O. H. Krikorian—182
Influence of ion size upon the intensity of Eu^{3+} fluorescence in the tungstates, L. G. Van Uitert and R. R. Soden—517
Lifetime of the lowest excited level of N_2, N. P. Carleton and O. Oldenberg—3460
Measured transition probability for the first-positive band system of nitrogen, Walter H. Wurster—2111
Observations on the pink nitrogen afterglow, Robert A. Young—2854
Polarization of $T \rightarrow S$ emission spectra of azines, V. G. Krishna and Lionel Goodman—2217
Pressure dependence of fluorescence spectra. II. Transient effects, David J. Wilson—1293
Pressure dependence of fluorescence spectra. III. Effect of finite pulse length, Joseph W. Brauner and David J. Wilson—2547
Role of f-orbital electron wave function mixing in the concentration quenching of Eu^{3+}, L. G. Van Uitert, R. C. Linares, R. R. Soden, and A. A. Ballman—702
Selective excitation of trivalent thulium via intramolecular energy transfer, G. A. Crosby and R. E. Whan—863
Short uv emission from acetylene flames, Clifford W. Hand—2521(L)
Spectrum of C_3, Leo Brewer and John L. Engelke—992
Spin relaxation in optical pumping, Robert A. Bernheim—135
Study of electronically excited hydroxyl radicals in the $H+O_3$ atomic flame, H. P. Broida—444
Thermoluminescence from gamma-irradiated biochemicals. Investigation of emission spectra, C. J. Weinberg, D. R. Nelson, J. G. Carter, and L. G. Augenstine—2869
Thermoluminescence of solid nitrogen after electron bombardment at 4.2°K, Brian Brocklehurst and George C. Pimentel—2040

Energy Transfer

Deactivation of $Hg(6^3P_1)$ by CO and N_2, Milton D. Scheer and Joseph Fine—1264
De-excitation of molecular vibration by collision, Ernest Bauer and F. W. Cummings—618
Dielectric relaxation in liquid alcohols and diols, Matthew W. Sagal—2437
Dissociation of gaseous diatomic molecules classical adiabatic scattering approach, John C. Light—1016
Excitation of molecular vibration by slow electron impact, J. C. Y. Chen and J. L. Magee—1407
Fluorescence energy transfer and oxygen quenching in solutions of diphenyloxazole in cyclohexane, Arye Weinreb—890

Ionic complexes of Xe and C_2H_2 produced by the radiolysis of these gases, P. S. Rudolph, S. C. Lind, and C. E. Melton—1031
Momentum transfer to an atom in a molecule: Internal excitation and bond dissociation, Chi-hua Hsiung and Adon A. Gordus—947
On the theory of energy exchange in liquids by isolated binary encounters, Karl F. Herzfeld—3305
Pressure dependence of fluorescence spectra. III. Effect of finite pulse length, Joseph W. Brauner and David J. Wilson—2547
Radiationless process involving change of multiplicity in the diazenes, M. A. El-Sayed—573(L)
Radiationless transitions: A semiclassical model, Martin Gouterman—2846
Relative efficiencies of inert third bodies in dissociating oxygen, John P. Rink—572(L)
Selective excitation of trivalent thulium via intramolecular energy transfer, G. A. Crosby and R. E. Whan—863
Shock-tube study of the vibrational relaxation of nitric oxide, Kurt L. Wray—2597

Equation of State

Molecular interaction in saturated hydrocarbons, R. P. Rastogi and H. L. Girdhar—998
Second virial coefficient for the spherical shell potential, Andrew G. De Rocco and William G. Hoover—916
Thermodynamic functions at liquid-vapor transition range of the van der Waals, the Berthelot, and the Dieterici equations of state, Francis H. Ree—3373

Errata

Erratum: Addendum to some thermal data for Bi_2Te_3 [J. Chem. Phys. **33,** 305 (1960)], G. F. Bolling—1085(L)
Erratum: Analysis of polarized crystal spectra. The spectrum of cobalt (III) acetylacetonate [J. Chem. Phys. **35,** 1240 (1961)], T. S. Piper—1089(L)
Erratum: Analysis of the spectra of trivalent promethium and holmium [J. Chem. Phys. **35,** 1392 (1961)], M. H. Crozier and W. A. Runciman—1088(L)
Erratum and addendum: Atomic polarization. IV. Temperature dependence of the vibrational polarization of gases [J. Chem. Phys. **35,** 400 (1961)], Karl H. Illinger—1084(L)
Erratum: Band structure and transport of holes and electrons in anthracene [J. Chem. Phys. **35,** 1275 (1961)], Oliver H. LeBlanc, Jr.—1082(L)
Erratum: Concerning the feasibility of nuclear cooling with palladium hydride [J. Chem. Phys. **34,** 2185 (1961)], J. J. Fritz, H. J. Maria, and J. G. Aston—1089(L)
Erratum: Double and triple ionization in molecules induced by electron impact [J. Chem. Phys. **35,** 575 (1961)], F. H. Dorman and J. D. Morrison—2808(L)
Erratum: Low-temperature chemisorption. III. Studies in the field emission microscope [J. Chem. Phys. **35,** 1421 (1961)], Gert Ehrlich and F. G. Hudda—1088(L)
Erratum: Normal vibrations of the polymer molecules of helical configuration. II. A simple method of factoring of the secular equation [J. Chem. Phys. **35,** 1050 (1961)], Hiroyuki Tadokoro—1948(L)
Erratum: Proton magnetic resonance study of barium bromide monohydrate [J. Chem. Phys. **33,** 644 (1960)], J. W. McGrath and A. A. Silvidi—1082(L)
Erratum: Ring closure in a macromolecule [J. Chem. Phys. **34,** 1531 (1961)], B. J. Hiley and M. F. Sykes—2808(L)
Erratum: Thermodynamic properties of unipositive gaseous elemental ions [J. Chem. Phys. **33,** 35 (1960)], J. W. Green, D. E. Poland, and J. L. Margrave—1088(L)
Erratum: Time dependence of the statistical molecular weight distribution of the polymer resulting from vinyl polymerization [J. Chem. Phys. **35,** 630 (1961)], V. S. Nanda and R. K. Pathria—1688(L)
Erratum: Vibrational spectra of inorganic molecules. II. Infrared reflection spectra of liquid lithium, sodium, potassium, and silver nitrates [J. Chem. Phys. **35,** 1078 (1961)], J. K. Wilmshurst and S. Senderoff—1088(L)

Faraday Effect

Theory of magnetic rotation spectra, H. F. Hameka—2540

Field Emission Microscopy

Direct observations of individual adatoms: Nitrogen on tungsten, Gert Ehrlich and F. G. Hudda—3233
Effect of chemisorbed nitrogen on the work function of tungsten, M. P. Hill and B. A. Pethica—3095(L)
Electrical measurement of whisker field-emission characteristics, Allan J. Melmed—1101(L)
Erratum: Low-temperature chemisorption. III. Studies in the field emission microscope [J. Chem. Phys. **35,** 1421 (1961)], Gert Ehrlich and F. G. Hudda—1088(L)
Structure and surface binding. N and CO on tungsten, Gert Ehrlich—1171
Study of the adsorption of hydrogen, ethane, ethylene, and acetylene on iridium by field emission microscopy, John R. Arthur, Jr. and Robert S. Hansen—2062

Films (see Surface Phenomena)

Flames

Electron-molecule and electron-atom collision cross sections from a cyclotron resonance study of flame gases, E. M. Bulewicz—385
Electron-molecule collision cross sections in the burned gases of a variety of fuels, E. M. Bulewicz and P. J. Padley—2231(L)
Reactions of sodium with active hydrogen, J. C. Polanyi and C. M. Sadowski—2239
Short uv emission from acetylene flames, Clifford W. Hand—2521(L)
Study of electronically excited hydroxyl radicals in the $H+O_3$ atomic flame, H. P. Broida—444

Fluorescence

Deactivation of $Hg(6^3P_1)$ by CO and N_2, Milton D. Scheer and Joseph Fine—1264
Delayed fluorescence of acriflavine in rigid media, E. C. Lim and G. W. Swenson—118
Effect of styrene monomer on the fluorescence properties of polystyrene, Louis J. Basile—2204

Effects of rare-earth ion substitution upon the fluorescence of terbium hexa-antipyrene tri-iodide and sodium europium tungstate, L. G. Van Uitert and R. R. Soden—1797

Electrofluorescence of rare-earth activated Al_2O_3. I, Adams and J. W. Mellichamp—2456

Energy levels of hexagonal $ErCl_3$, F. Varsanyi and G. H. Dieke—2951

Enhancement of rare-earth ion fluorescence by lattice processes in oxides, L. G. Van Uitert, R. R. Soden, and R. C. Linares—1793

Fluorescence energy transfer and oxygen quenching in solutions of diphenyloxazole in cyclohexane, Arye Weinreb—890

Fluorescence of *s*-tetrazine, Mihir Chowdhury and Lionel Goodman—548(L)

Fluorescence spectrum and the energy levels of the Sm^{2+} ion, G. H. Dieke and R. Sarup—371

Influence of ion size upon the intensity of Eu^{3+} fluorescence in the tungstates, L. G. Van Uitert and R. R. Soden—517

Intermolecular proton transfer in the excited hydrogen-bonded complex in nonpolar solvent and fluorescence quenching due to hydrogen bonding, Noboru Mataga and Yozo Kaifu—2804(L)

Observation of anomalous phosphorescence–fluorescence intensity ratio in excitation of upper electronic states of certain aromatic hydrocarbons, M. F. O'Dwyer, M. Ashraf El-Bayoumi, and S. J. Strickler—1395(L)

Organic liquid scintillators. III. On the quantum yield of fluorescence and the quenching of fluorescence by oxygen, Adam Heller—2858

Pressure dependence of fluorescence spectra. II. Transient effects, David J. Wilson—1293

Pressure dependence of fluorescence spectra. III. Effect of finite pulse length, Joseph W. Brauner and David J. Wilson—2547

Role of *f*-orbital electron wave function mixing in the concentration quenching of Eu^{3+}, L. G. Van Uitert, R. C. Linares, R. R. Soden, and A. A. Ballman—702

Selective excitation of trivalent thulium via intramolecular energy transfer, G. A. Crosby and R. E. Whan—863

Free Radicals

Absolute rate constant for the reaction of hydroxyl radicals with benzene in water, Leon M. Dorfman, R. E. Bühler, and I. A. Taub—549(L)

Disappearance of trapped hydrogen atoms in gamma-irradiated ice, John M. Flournoy, Lillian H. Baum and Seymour Siegel—2229(L)

EPR spectrum of an azulene free radical anion, Harmon W. Brown and Robert C. Jones—2809(L)

Electron spin resonance and internal rotation of the methyl group in the $CH_3C(COOH)_2$ radical, Chonon Heller—175

ESR detection of the cyanogen and methylene imino free radicals, Edward L. Cochran, Frank J. Adrian, and Vernon L. Bowers—1938

Electron spin resonance of tetraphenylpyrryl radical, S. M. Blinder, M. L. Peller, N. W. Lord, L. C. Aamodt, and N. S. Ivanchukov—540

Electron spin resonance of the phenanthrene negative ion, Sivert H. Glarum and Lawrence C. Snyder—2989

Electron spin resonance study of radiation damage in single crystals of *dl*-aspartic acid, Thadho S. Jaseja and Roy S. Anderson—2727

Free radicals in irradiated nylon, Y. Shinohara and D. Ballantine—3042

Gaseous reaction of methyl radicals with propylene, Mituji Miyoshi and R. K. Brinton—3019

Magnetic susceptibilities of crystalline stable free radicals in the 77–293°K temperature range, William Duffy, Jr.—490

Mass spectrometry of the HO_2 free radical, S. N. Foner and R. L. Hudson—2681

Microwave saturation in radiation-induced free radicals, J. A. Simmons—469

Paramagnetic excitons in solid free radicals, Harden M. McConnell and Ruth Lynden-Bell—2393

Reactions of CF_3 radicals with perfluoroacetone, Alvin S. Gordon—1330

Spin distribution in tetramethyl-1,3-cyclobutanedione ketyl, Raymond L. Ward—2230(L)

Study of electronically excited hydroxyl radicals in the $H+O_2$ atomic flame, H. P. Broida—444

Unimolecular decomposition of vibrationally excited ethane and ethyl radicals, Carl A. Heller and Alvin S. Gordon—2648

Free Rotation (see Rotation)

Gases

Consistency and the fifth virial coefficient for a hard-sphere gas, G. H. A. Cole—1680

Dielectric constants of imperfect gases. II. Carbon dioxide and ethylene, D. R. Johnston and R. H. Cole—318

Dissociation of halogens in shock waves, Hiroyuki Hiraoka and R. Hardwick—1715

Double probe measurements of ionization in active nitrogen, H. P. Broida and Ikuzo Tanaka—236

Estimation of the mutual diffusion coefficient of hydrogen atoms and molecules, Stanley Weissman and E. A. Mason—794

Fourth virial coefficients for the 12-6 potential, J. A. Barker and J. J. Monaghan—2564

Heat conductivity of polyatomic and polar gases, E. A. Mason and L. Monchick—1622

Ionizing collisions of metastable helium atoms in gases, W. P. Sholette and E. E. Muschlitz, Jr.—3368

Mass spectrometric studies of atom reactions. I. Reactions in the atomic nitrogen–ozone system, L. F. Phillips and H. I. Schiff—1509

Mass spectrometry of ions in glow discharges. I. The apparatus and its application to the positive column in rare gases, P. F. Knewstubb and A. W. Tickner—674

Mass spectrometry of ions in glow discharges. II. The negat iv glow in rare gases, P. F. Knewstubb and A. W. Tickner—684

Medium effects in proton magnetic resonance. I. Gases, W. T. Raynes, A. D. Buckingham, and H. J. Bernstein—3481

Motion of small suspended particles in nonuniform gases, Edward A. Mason and Sydney Chapman—627

NMR measurements of self-diffusion in normal hydrogen gas from 55° to 90°K, Max Lipsicas—1235

Parent-ion recapture in gases, S. G. ElKomoss and J. L. Magee—256

Reaction of active nitrogen with nitrous oxide at −196°C, E. R. Zabolotny and H. Gesser—565(L)

Relative efficiencies of inert third bodies in dissociating oxygen, John P. Rink—572(L)
Second virial coefficients of argon, krypton, and argon-krypton mixtures at low temperatures, B. E. F. Fender and G. D. Halsey, Jr.—1881
Studies on mutual diffusion of polar-nonpolar gas mixtures, B. N. Srivastava and I. B. Srivastava—2616
Temperature-dependent chemical shifts in the NMR spectra of gases, A. D. Buckingham—3096(L)
3,3-dimethyl-2-thiabutane: Chemical thermodynamic properties and barriers to internal rotation, D. W. Scott, W. D. Good, S. S. Todd, J. F. Messerly, W. T. Berg, I. A. Hossenlopp, J. L. Lacina, Ann Osborn, and J. P. McCullough—406
Transport properties of polar gas mixtures, E. A. Mason and L. Monchick—2746
Virial coefficients for square-well potentials, J. A. Barker and J. J. Monaghan—2558
Virial expansion of the solution of the Kirkwood integral equation for the radial distribution function of a fluid, George Stell—1817

Glasses

Low-temperature solution spectra of methylcyclohexane benzene. Effect of oxygen and carbon tetrachloride, Hiroshi Tsubomura and Robert P. Lang—2155
Nucleation of zinc on glass, John B. Hudson—887
Rate and pressure effects in polymers and other glass-forming substances, F. Bueche—2940

Heat Capacity (see Thermodynamic Properties)

High Pressures

Compression and phase transitions of solid HCl, HBr, SiH_4, and SF_6, John W. Stewart—400
On the speed of reactions at high pressures, Edward Teller—901

Hindered Rotation (see Rotation)

Infrared Spectra (see Absorption Spectra)

Intensities of Spectra

Enhancement of Eu^{3+} emission by Tb^{3+}, L. G. Van Uitert and R. R. Soden—1289
On the determination of absolute intensities from refractive index data, Shiro Maeda and P. N. Schatz—571(L)
Raman spectral studies of the effects of electrolytes on water, George E. Walrafen—1035
Spectrum of C_3, Leo Brewer and John L. Engelke—992

Isotope Effects

C^{13} splittings in proton magnetic resonance spectra. III. Formyl compounds, Norbert Muller—359
Double resonance resonance spectra of N^{14} and N^{15} ammonia ion, John D. Baldeschwieler—152
Effects of helium buffer gas atoms on the atomic hydrogen hyperfine frequency, George A. Clarke—2211
Heat capacities and thermodynamic functions of YH_2 and YD_2 from 5° to 350°K and the hydrogen vibration frequencies, Howard E. Flotow, Darrell W. Osborne, and Klaus Otto—866
Hydrogen–deuterium kinetic isotope effect at very high temperature, Harold S. Johnston and Eugene Tschuikow-Roux—463
Infrared spectra and vibrational assignments for *cis* and *trans* 1,2-difluoroethylenes: HFC—CFH, HFC=CFD, and DFC=CFD, Norman C. Craig and Eric A. Entemann—243
Isotopic fractionation of nitrogen in the nitrogen oxide–nitrate exchange system, Marvin J. Stern, Lois Nash Kauder, and W. Spindel—764
Molecular structure of ethyl chloride, R. H. Schwendeman and G. D. Jacobs—1245
Mössbauer spectra of some iron complexes, L. M. Epstein—2731
On secondary isotope effects in molecular structure, L. S. Bartell—3495(L)
Photolysis of nitrous oxide. II. 1470 and 1830 A, John P. Doering and Bruce H. Mahan—1682
Relations among vibrational frequencies of isotopically substituted molecules and the determination of force constants, Julian Heicklen—721
Resonant gamma-ray absorption in potassium ferrate, G. K. Wertheim and R. H. Herber—2497
Vacuum uv photolysis of solid ethane at 77°K, Milton D. Scheer, James McNesby, and Ralph Klein—3504(L)
Vibrational excitons. II. Degenerate vibrations, R. M. Hexter—2285

Isotopes

Isotopic fractionation of nitrogen in the nitrogen oxide–nitrate exchange system, Marvin J. Stern, Lois Nash Kauder, and W. Spindel—764

Kinetics of Reaction

Absolute rate constant for the reaction of hydroxyl radicals with benzene in water, Leon M. Dorfman, R. E. Bühler, and I. A. Taub—549(L)
Activated complexes of fast bimolecular reactions, Teresa S. Ree, Taikyue Ree, Henry Eyring, and Takayuki Fueno—281
Axiomatic treatment of chemical reaction systems, J. Wei—1578
Comment on the calculation of rate constants from transition state theory, Donald Rapp and Ralph E. Weston, Jr.—2807(L)
Comparison of the classical theories of unimolecular reactions, Everett Thiele—1466
Decomposition of excited alkyl radicals in the liquid phase, Edward K. C. Lee and F. S. Rowland—554(L)
De-excitation of molecular vibration by collision, Ernest Bauer and F. W. Cummings—618
Departure from the steady state in chain reactions with two or more radicals, J. Calvin Giddings and Hyung Kyu Shin—640
Dissociation energy and rate of decomposition of C_2N_2, Wing Tsang, S. H. Bauer, and M. Cowperthwaite—1768
Dissociation of gaseous diatomic molecules classical adiabatic scattering approach, John C. Light—1016
Dissociation of the hydroxyl radical in an rf discharge, David W. Howgate—239

Dissociation rates of deuterium, John P. Rink—1398(L)
Electron-molecule and electron-atom collision cross sections from a cyclotron resonance study of flame gases, E. M. Bulewicz—385
Electron-molecule collision cross sections in the burned gases of a variety of fuels, E. M. Bulewicz and P. J. Padley—2231(L)
Emission of vacuum ultraviolet radiation from the acetylene–oxygen and the methane–oxygen reactions in shock waves, G. B. Kistiakowsky and L. Willard Richards—1707
Gaseous reaction of methyl radicals with propylene, Mituji Miyoshi and R. K. Brinton—3015
General potential energy function for exchange reactions, Frederick T. Wall and Richard N. Porter—3256
High-kinetic energy fragment ions from aliphatic hydrocarbons under electron impact. II. Propane, Toshikazu Tsuchiya—568(L)
Hydrogen–deuterium kinetic isotope effect at very high temperature, Harold S. Johnston and Eugene Tschuikow-Roux—463
Initial stages of the chlorine atom induced polymerization of acetylene, M. H. J. Wijnen—1672
Initiation of explosions by hot spots, John Zinn—1949(L)
Ionization and dissociation of hydrogen peroxide by electron impact, S. N. Foner and R. L. Hudson—2676
Kinetic study of the formation and reaction of CN molecules in shock waves, W. L. Patterson, Jr., and E. F. Greene—1146
Kinetics of condensation of water vapor, Welby G. Courtney—2018
Kinetics of excited molecules. IV. Unimolecular dissociation of ketene, Gladstone A. Taylor and Gerald B. Porter—1353
Mass spectrometric studies of atom reactions. I. Reactions in the atomic nitrogen–ozone system, L. F. Phillips and H. I. Schiff—1509
Mass spectrometric studies of atom reactions. II. Vibrationally excited H_2 formed by the reaction of N atoms with NO, L. F. Phillips and H. I. Schiff—3283
Mass spectrometry of the HO_2 free radical, S. N. Foner and R. L. Hudson—2681
Measurement of the dissociation rates of hydrogen and deuterium, Emmett A. Sutton—2923
Mechanism for the reaction of active nitrogen and atomic hydrogen, Gene G. Mannella—1079(L)
Mechanism of atom recombination by consecutive vibrational deactivations, Sidney W. Benson and Takayuki Fueno—1597
Non-steady-state nucleation, Welby G. Courtney—2009
NMR study of the protolysis kinetics in simple amino acids. I. Sarcosine hydrochloride and its ester, M. Sheinblat—3103
On the applicability of the Temkin–Pyzhev equation for the determination of activation energies of ammonia synthesis at one atmosphere pressure, R. Brill and S. Tauster—2100
On the mechanism of disproportionation of alkyl radicals, J. N. Bradley and B. S. Rabinovitch—3498(L)
On the speed of reactions at high pressures, Edward Teller—901
Parent-ion recapture in gases, S. G. ElKomoss and J. L. Magee—256
Photochemical decomposition of ozone in yellow-red light and the mechanism of its thermal decomposition, E. Castellano and H. J. Schumacher—2238(L)
Photolysis of acetone in the presence of HI and the decomposition of the acetyl radical, Edward O'Neal and Sidney W. Benson—2196
Photolysis of mixtures of cyclobutane and acetone-d_6. Reactions of cyclobutyl radical, Alvin S. Gordon, S. Ruven Smith, and Charles M. Drew—824
Photosensitized reaction between hydrogen (^2P) atoms and molecular nitrogen, Ikuzo Tanaka and J. R. McNesby—3170
Pulse radiolysis studies. I. Transient spectra and reaction rate constants in irradiated aqueous solutions of benzene, Leon M. Dorfman, I. A. Taub, and R. E. Bühler—3051
Pyrolysis of di-tertiary butyl peroxide: Temperature gradients and chain contribution to the rate, Leslie Batt and Sidney W. Benson—895
Radiolysis of ethane-1,1,1-d_3, Louis J. Stief and P. Ausloos—2094
Rare gas molecule-ion formation by mass spectrometry. Kinetics of Ar_2^+, Ne_2^+, and He_2^+ formation by second- and third-order processes, J. S. Dahler, J. L. Franklin, M. S. B. Munson, and F. H. Field—3382
Rate constants for the unimolecular decomposition of excited molecular species near threshold, Max Wolfsberg—1072
Rates of reaction of hydrogen with iodine. II, John H. Sullivan—1925
Reaction of active nitrogen with nitrous oxide at −196°C, E. R. Zabolotny and H. Gesser—565(L)
Reactions of sodium with active hydrogen, J. C. Polanyi and C. M. Sadowski—2239
Recombination rates of alkali metal ions, I. R. King—553(L)
Relative efficiencies of inert third bodies in dissociating oxygen, John P. Rink—572(L)
Scattering matrix and chemical reaction rates, Felix T. Smith—248
Shock tube determination of dissociation rates of hydrogen, John P. Rink—262
Shock-tube measurement of dissociation rates of hydrogen, Richard W. Patch—1919
Shock-tube study of the kinetics of nitric oxide at high temperatures, Kurt L. Wray and J. Derek Teare—2582
Some photochemical reactions of O_3 in the gas phase, D. Katakis and H. Taube—416
Table of values based on a Maxwell–Boltzmann distribution for calculations of the kinetic properties of energized molecules, C. Sivertz and D. Goldsack—569(L)
Termination products and processes in the pyrolysis of dimethyl ether, Kenneth H. Anderson and Sidney W. Benson—2320
Thermal decomposition of gaseous dimethylnitramine, John M. Flournoy—1106(L)
Thermal decomposition of gaseous 2,2-dinitropropane, John M. Flournoy—1107(L)
Thermal decomposition of nitryl chloride in shock waves, Hiroyuki Hiraoka and R. Hardwick—2164
Thermal isomerization of isopropyl-1,1,1-d_3 radicals, W. M. Jackson and J. R. McNesby—2272
Unimolecular decomposition of vibrationally excited ethane and ethyl radicals, Carl A. Heller and Alvin S. Gordon—2648

Large Molecules (see Polymers)

Light Scattering

Critical opalescence of binary liquid mixtures: Methanol–cyclohexane; aniline–cyclohexane, P. Debye, B. Chu, and H. Kaufman—3378
Critical opalescence of polystyrene in cyclohexane range of molecular forces and radius of gyration, P. Debye, B. Chu, and D. Woermann—1803

Multicomponent polyelectrolyte solutions. I. Thermodynamic equations for light-scattering and sedimentation, Henryk Eisenberg—1837
Multicomponent polyelectrolyte solutions. II. Excluded volume study of polyvinyl-sulfonate alkali halide systems, Henryk Eisenberg and Daniel Woodside—1844
Theoretical investigations on the light scattering of spheres. XIII. The "wavelength exponent" of differential turbidity spectra, Wilfried Heller, Hari L. Bhatnagar, and Masayuki Nakagaki—1163

Liquids

Absorption and dispersion of sound in critical mixtures, Marshall Fixman—1961
Atomic distribution in liquid argon near the triple point, N. S. Gingrich and C. W. Tompson—2398
Calorimetry in liquid thallium nitrate–alkali nitrate mixtures, O. J. Kleppa and L. S. Hersh—544
Comments on Dr. Nettleton's Letter, R. Zwanzig—2227(L)
Diffraction of x rays by liquid neon, Dante Stirpe and C. W. Tompson—392
Diffusion and equilibrium in two-phase binary liquid systems, K. J. Reid—559(L)
Equation of state for liquid alkylated ring hydrocarbons, Stuart T. Hadden and Robert Simha—1104(L)
Equation of state of liquids at constant volume, E. B. Smith—1404(L)
Homogeneous nucleation in a miscibility gap system. A critical test of nucleation theory, B. E. Sundquist and R. A. Oriani—2604
Microwave absorption and molecular structure in liquids. XLV. The dispersion of alkyl halides at millimeter wavelengths, W. E. Vaughan, W. S. Lovell, and C. P. Smyth—753
Molecular collision models and transition probabilities in liquids, R. E. Nettleton—2226(L)
On the theory of energy exchange in liquids by isolated binary encounters, Karl F. Herzfeld—3305
Self-diffusion in liquid tin, C. H. Ma and R. A. Swalin—3014
Structure of water and hydrophobic bonding in proteins. I. A model for the thermodynamic properties of liquid water, George Némethy and Harold A. Scheraga—3382
Structure of water and hydrophobic bonding in proteins. II. A model for the thermodynamic properties of aqueous solutions of hydrocarbons, George Némethy and Harold A. Scheraga—3401
Theory of condensation of liquids of one and two components, Felix Cernuschi and Myriam Segre—412
Van der Waals energy changes in the mixing of molten salts, M. Blander—1092(L)
Vibrational spectra of inorganic molecules. IV. The infrared reflection spectra of liquid lithium, sodium, potassium and silver chlorates and liquid lithium perchlorate, J. K. Wilmshurst—2415
Volumetric and thermodynamic properties of fluids. VI. Relationship of molecular properties to the acentric factor, F. Danon and Kenneth S. Pitzer—425

Magnetic Cooling

Erratum: Concerning the feasibility of nuclear cooling with palladium hydride [J. Chem. Phys. **34,** 2185 (1961)], J. J. Fritz, H. J. Maria, and J. G. Aston—1089(L)

Magnetic Resonance

An analysis of paramagentic resonance properties of pure and bleached *F*-centers in potassium chloride, Gordon A. Noble and Jordan J. Markham—1340
Analysis of the EPR spectrum of *N,N'*-tetramethylbenzidine positive ion, Z. Galus and Ralph N. Adams—2814(L)
Analysis of the ESR spectrum of NO_2 in solid argon, Frank J. Adrian—1692(L)
Application of the sideband technique to wide-line NMR spectra, J. V. Acrivos—1097(L)
Calculation of electron-coupled nuclear spin–spin interactions in molecules by a variational procedure, D. E. O'Reilly—274
Calculation of NMR chemical shifts, D. E. O'Reilly—855
Chemical shift of the Pb^{207} NMR in some polar semiconductors, I. Weinberg—1112(L)
Chemical shifts and ring currents in condensed ring hydrocarbons, Neville Jonathan, Sidney Gordon, and B. P. Dailey—2443
Comments on "NMR fluorine–fluorine coupling constants in saturated organic compounds," J. I. Musher—1086(L)
Computer assignment technique for analysis of high-resolution NMR spectra, Donald R. Whitman—2085
C^{13} splittings in proton magnetic resonance spectra. III. Formyl compounds, Norbert Muller—359
Detailed hyperfine structure in the electron paramagnetic resonance absorption spectrum of the phenazine semiquinone ion, D. W. Schieser and P. Zvirblis—2237(L)
Deuteron magnetic resonance study of several deuterated ammonium salts, Takehiko Chiba—1122
Disappearance of trapped hydrogen atoms in gamma-irradiated ice, John M. Flournoy, Lillian H. Baum, and Seymour Siegel—2229(L)
Double resonance spectra of N^{14} and N^{15} ammonia ion, John D. Baldeschwieler—152
Dynamic nuclear polarization in a perylene–iodine complex, S. F. J. Read—3098(L)
Dynamic nuclear polarization studies of charred carbohydrates, J. J. Krebs and J. K. Thompson—2509
Dynamic polarization in asphaltene solutions, Edward H. Poindexter and Jean Uebersfeld—2706
Effect of dispersion interaction on nuclear magnetic resonance shifts, Bentz B. Howard, Bruno Linder, and Merle T. Emerson—485
Electron coupling of nuclear spins. V. Vibrational effects in CHX groups, H. S. Gutowsky, V. D. Mochel, and B. G. Somers—1153
Electron-molecule and electron-atom collision cross sections from a cyclotron resonance study of flame gases, E. M. Bulewicz—385
Electron-molecule collision cross sections in the burned gases of a variety of fuels, E. M. Bulewicz and P. J. Padley—2231(L)
Electron paramagnetic relaxation in ionic solutions, Ralph G. Pearson and Tomas Buch—1277
Electron paramagnetic resonance of rhenium (IV) in a cubic field, Paul B. Dorain and Ronald Rahn—561(L)
Electron paramagnetic resonance spectra of copper complexes, H. R. Gersmann and J. D. Swalen—3221
EPR spectrum of an azulene free radical anion, Harmon W. Brown and Robert C. Jones—2809(L)

Electron spin resonance absorption and other properties of some solid hydrocarbon-quinone complexes, John W. Eastman, Gaylord M. Androes, and Melvin Calvin—1197

Electron spin resonance and internal rotation of the methyl group in the $CH_3C(COOH)_3$ radical, Chonon Heller—175

ESR detection of the cyanogen and methylene imino free radicals, Edward L. Cochran, Frank J. Adrian, and Vernon L. Bowers—1938

Electron spin resonance in a gamma-irradiated single crystal of diglycolic acid monohydrate, Yukio Kurita—560(L)

ESR linewidths in dilute hexaaquomanganese (II) solutions at 9.4 and 24 kMc, A. W. Nolle and L. O. Morgan—378

Electron spin resonance of an irradiated single crystal of deuterated DL-tartaric acid, D.V.G.L. Narasimha Rao and Walter Gordy—1143

Electron spin resonance of irradiated ethyl bromide, F. W. Mitchell, B. C. Green and J. W. T. Spinks—1095(L)

Electron spin resonance of irradiated single crystals of alanines: Hindered rotation of the methyl group in a free radical, Ichiro Miyagawa and Koichi Itoh—2157

Electron spin resonance of semiquinones in aprotic solvents, Ellery W. Stone and August H. Maki—1944(L)

Electron spin resonance of tetraphenylpyrryl radical, S. M. Blinder, M. L. Peller, N. W. Lord, L. C. Aamodt, and N. S. Ivanchukov—540

Electron spin resonance of the phenanthrene negative ion, Sivert H. Glarum and Lawrence C. Snyder—2989

ESR spectrum and structure of the formyl radical, Frank J. Adrian, Edward L. Cochran, and Vernon A. Bowers—1661

ESR spectrum of the 4,4′-dipyridyl radical, F. Bruin, F. W. Heineken, M. Bruin, and A. Zahlan—2783

Electron spin resonance studies of DPPH solutions, Hisashi Ueda, Zenichiro Kuri, and Shoji Shida—1676

ESR studies on the formation of sulfur radicals in irradiated cysteine, glutathione, and djenkolic acid, Thormod Henriksen—1258

Electron spin resonance study of γ-irradiated single crystals of *dl*-isovaline, Thadho S. Jaseja and Roy S. Anderson—1098(L)

Electron spin resonance study of radiation damage in single crystals of *dl*-aspartic acid, Thadho S. Jaseja and Roy S. Anderson—2727

Empirical method for estimating diamagnetic anisotropy effects in NMR spectroscopy, based upon the use of C^{13}—H coupling constants, J. H. Goldstein and G. S. Reddy—2644

Energy transfer in irradiated alkyl disulfide, Frank K. Truby 2227(L)

Erratum: Double and triple ionization in molecules induced by electron impact [J. Chem. Phys. **35,** 575 (1961)], F. H. Dorman and J. D. Morrison—2808(L)

Erratum: Proton magnetic resonance study of barium bromide monohydrate [J. Chem. Phys. **33,** 644 (1960)], J. W. McGrath and A. A. Silvidi—1082(L)

Fluorine–fluorine nuclear spin–spin decoupling, Daniel D. Elleman and Stanley L. Manatt—1945(L)

Fluorine NMR spectroscopy. X. Analysis of carbon-13 satellites in the spectra of *cis*- and *trans*-CFCl=CFCl. The assignment of coupling constants for fluorinated olefins, George V. D. Tiers and Paul C. Lauterbur—1110(L)

Formation of spin centers in carbons by oxidation, K. Antonowicz—2046

Free radicals in irradiated nylon, Y. Shinohara and D. Ballantine—3042

Hyperfine interactions in x-irradiated magnesium phosphite hexahydrate, Melvin W. Hanna and Larry J. Altman—1788

Intensity sum rule for NMR, George Gioumousis and J. D. Swalen—2077

Interpair nuclear magnetic relaxation in hydrated crystals, D. F. Holcomb and B. Pedersen—3270(L)

Long-range proton coupling constants in vinyl formate, T. Schaefer—2235(L)

Magnetic field dependence of the Al^{27} polarization time in ruby, A. Szabo—562(L)

Magnetic resonance of strongly coupled nuclear spin systems. Refined analysis of complicated NMR spectra, Yoji Arata, Hiroshi Shimizu, and Shizuo Fujiwara—1951

Medium effects in proton magnetic resonance. I. Gases, W. T. Raynes, A. D. Buckingham, and H. J. Bernstein—3481

Microwave saturation in radiation-induced free radicals, J. A. Simmons—469

Mössbauer spectra of some iron complexes, L. M. Epstein—2731

Note on hyperfine interaction tensors in ESR spectra, Jan W. H. Schreurs and Daniel Kivelson—117

Note on the earth's field proton free-precession signal of fluorobenzene, Don D. Thompson and Robert J. S. Brown—2812(L)

Nuclear magnetic resonance effects in aqueous solutions of 1-1 electrolytes, J. C. Hindman—1000

Nuclear magnetic resonance in hexamethylbenzene at low temperatures, Z. M. El Saffar—1093(L)

Nuclear magnetic resonance in metal tungsten bronzes, W. H. Jones, Jr., E. A. Garbaty, and R. G. Barnes—494

NMR measurements of self-diffusion in normal hydrogen gas from 55° to 90°K, Max Lipsicas—1235

NMR of a glycine single crystal, W. E. Webb and W. G. Moulton—1911

Nuclear magnetic resonance of arsenic and antimony in liquid AsF_5 and $SbCl_5$, Eric D. Jones and Edwin A. Uehling— 1691(L)

Nuclear magnetic resonance spectra of silicon hydrides and derivatives. I. Coupling constants involving hydrogen, E. A. V. Ebsworth and J. J. Turner—2628

Nuclear magnetic resonance spectrum of B^{11} in lesserite, K. S. Pennington and H. E. Petch—2151

NMR spectrum of propylene sulfide, J. I. Musher and R. G. Gordon—3097(L)

NMR spectrum of 3,3,3-trichloropropene, S. Castellano and G. Caporiccio—566(L)

NMR studies of conformational equilibria in substituted ethanes, H. S. Gutowsky, Geneva G. Belford, and P. E. McMahon—3353

Nuclear magnetic resonance study of collagen hydration, Herman J. C. Berendsen—3297

NMR study of indene using a proton–proton decoupling technique, Daniel D. Elleman and Stanley L. Manatt—2346

Nuclear magnetic resonance study of the diffusion of hydrogen in zirconium hydride, J. F. Hon—759

NMR study of the protolysis kinetics in simple amino acids. I. Sarcosine hydrochloride and its ester, M. Sheinblatt—3103

Nuclear relaxation in adulterated hydrogen, C. S. Johnson, Jr. and J. S. Waugh—2266

Observations in proton NMR spectra of long range coupling between protons and carbon-13 in natural abundance, D. R. McAdams—1948(L)

Oxygen-17 NMR shifts in aqueous solutions of rare-earth ions, W. Burton Lewis, Jasper A. Jackson, Joe Fred Lemons, and Henry Taube—694

Paramagnetic excitons in solid free radicals, Harden M. McConnell and Ruth Lynden-Bell—2393

Paramagnetic relaxation in asphalt solutions, Edward H. Poindexter—507

Paramagnetic resonance of nickel ions in double nitrate crystals, J. W. Culvahouse—2720

Paramagnetic resonance of some benzophenone derivatives in their phosphorescent state, L. H. Piette, J. H. Sharp, T. Kuwana, and J. N. Pitts, Jr.—3094(L)

Proton magnetic resonance spectra of 3-pyridines: The unsymmetrical four-spin *ABXY* and *ABKL* systems, Valdemar J. Kowalewski and Dora G. de Kowalewski—266

Proton magnetic resonance studies of polycrystalline uranium oxide-hydrates. I β-$UO_3 2H_2O$, A. L. Porte, H. S. Gutowsky, and J. E. Boggs—1695

Proton magnetic resonance studies of polycrystalline uranium oxide-hydrates. II. β-UO_3H_2O, A. L. Porte, H. S. Gutowsky, and J. E. Boggs—1700

Proton magnetic resonance studies on hexamethylenetetramine —structure, molecular reorientation, and impurity diffusion, George W. Smith—3081

Quadrupolar study of barium in barium bromide dihydrate by proton magnetic resonance, J. W. McGrath and A. A. Silvidi—1496

Relation between ESR spectra and molecular orientation in irradiated polyethylene, Michio Kashiwagi—575

Remarks on J. I. Musher's comments to our paper, L. Petrakis and C. H. Sederholm—1087(L)

Resonant gamma-ray absorption in potassium ferrate, G. K. Wertheim and R. H. Herber—2497

Spectroscopic studies on organometallic compounds. V. Fluorine nuclear magnetic resonance spectra of some perfluoroalkyl and perfluoroacyl metal compounds, E. Pitcher, A. D. Buckingham, and F. G. A. Stone—124

Spin correlation in ion radical salts; the system $(Cs^+)_2(TCNQ)_3$, D. B. Chesnut and Paul Arthur, Jr.—2969

Spin density fluctuations in the cyclooctatetraene negative ion, Andrew D. McLachlan and Lawrence C. Snyder—1159

Spin distribution in sodium-metadinitrobenzene, Raymond L. Ward—1405(L)

Spin distribution in tetramethyl-1,3-cyclobutanedione ketyl, Raymond L. Ward—2230(L)

Spin exchange between excitons and free radicals, H. M. McConnell, H. O. Griffith, and D. Pooley—2518(L)

Spin relaxation processes in a two-proton system undergoing anisotropic reorientation, D. E. Woessner—1

Structure of the hydrogen-bonded water molecule in crystals, R. Chidambaram—2361

Temperature-dependent chemical shifts in the NMR spectra of gases, A. D. Buckingham—3096(L)

Transition metal binding in DNA solutions, J. Eisinger, R. G. Shulman, and B. M. Szymanski—1721

Valence-bond calculation of geminal spin–spin coupling constants in substituted methanes, Michael Barfield and David M. Grant—2054

Magnetic Susceptibilities

Calculation of nuclear magnetic shielding in hydrogen molecule, S. K. Ghosh and S. K. Sinha—737

Constitution and magnetic susceptibilities of vanadium-hydrogen alloys, R. L. Zanowick and W. E. Wallace—2059

Crystal and magnetic structure of cupric fluoride dihydrate at 4.2°K, S. C. Abrahams—56

Empirical method for estimating diamagnetic anisotropy effects in NMR spectroscopy, based upon the use of C^{13}-H coupling constants, J. H. Goldstein and G. S. Reddy—2644

Heat capacity and entropy of $CoCl_2$ and $MnCl_2$ from 11° to 300°K. Thermal anomaly associated with antiferromagnetic ordering in $CoCl_2$, R. C. Chisholm and J. W. Stout—972

Heat capacity and entropy of $CuCl_2$ and $CrCl_2$ from 11° to 300°K. Magnetic ordering in linear chain crystals, J. W. Stout and R. C. Chisholm—979

Magnetic properties of hydrogen fluoride. II. Susceptibility, R. P. Hurst, Martin Karplus and T. P. Das—2786

Magnetic susceptibilities of crystalline stable free radicals in the 77–293°K temperature range, William Duffy, Jr.—490

Magnetic susceptibility of potassium hexachlororhenate (IV) and potassium hexabromorhenate (IV) from 5 to 300°K, R. H. Busey and E. Sonder—93

Magnetic susceptibility of ReF_6, Henry Selig, Fred A. Cafasso, Dieter M. Gruen, and John G. Malm–3440

Magnetic susceptibility of the cubic sodium tungsten bronzes, John D. Greiner, Howard R. Shanks, and Duane C. Wallace —772

Mass Spectra

Charge-exchange phenomena in a mass spectrometer, George F. Crable and Gerard L. Kearns—558(L)

Charge states of molecular fragments from CCl_3Br following nuclear decay of Br^{80m} and Br^{82}, S. Wexler—1992

Collision-induced dissociation of N_2O^+, L. Friedman and A. P. Irsa—1082(L)

Decomposition of $(CH_3Xe^{131})^+$ following the nuclear decay of CH_3I^{131}, T. A. Carlson and R. M. White—2883

Double-oven experiments with lithium halide vapors, J. Berkowitz, H. A. Tasman, and W. A. Chupka—2170

Electron impact study of CO using a Lozier apparatus, Morton A. Fineman and Americo W. Petrocelli—25

Heat of formation of the CN radical, J. Berkowitz—2533

High-kinetic energy fragment ions from aliphatic hydrocarbons under electron impact. II. Propane, Toshikazu Tsuchiya—568(L)

Initial kinetic energy discrimination effects in cross-field ion sources, Norman D. Coggeshall—1640

Ionic complexes of Xe and C_2H_2 produced by the radiolysis of these gases, P. S. Rudolph, S. C. Lind, and C. E. Melton—1031

Ionization and dissociation of hydrogen peroxide by electron impact, S. N. Foner and R. L. Hudson—2676

Ionization and fragmentation of some molecules by high-energy electrons, P. Kebarle and E. W. Godbole—302

Mass spectrometric studies of atom reactions. I. Reactions in the atomic nitrogen–ozone system, L. F. Phillips and H. I. Schiff—1509

Mass spectrometric studies of atom reactions. II. Vibrationally excited H_2 formed by the reaction of N atoms with NO, L. F. Phillips and H. I. Schiff—3283

Mass spectrometric study of the gaseous molecules above AgSn, AuSn, and CuSn alloys, Marcel Ackerman, Jean Drowart, Fred E. Stafford, and Georges Verhaegen—1557

Mass spectrometric study of the reactions of $BF_3(g)$ with $BCl_3(g)$, $B(OH)_3(g)$ and $B_2O_3(l)$, Richard F. Porter, Dino R. Bidinosti, and K. F. Watterson—2104

Mass spectrometry of ions in glow discharges. I. The apparatus and its application to the positive column in rare gases, P. F. Knewstubb and A. W. Tickner—674

Mass spectrometry of ions in glow discharges. II. The negative glow in rare gases, P. F. Knewstubb and A. W. Tickner—684

Mass spectrometry of the HO_2 free radical, S. N. Foner and R. L. Hudson—2681

Metastable transitions in N_2O^+, G. M. Begun and L. Landau—1083(L)

Photo-ionization of alkyl free radicals, Fred A. Elder, Clayton Giese, Bruce Steiner, and Mark G. Inghram—3292

Rare-gas molecule-ion formation by mass spectrometry. Kinetics of Ar_2^+, Ne_2^+, and He_2^+ formation by second- and third-order processes, J. S. Dahler, J. L. Franklin, M. S. B. Munson, and F. H. Field—3332

Rate constants for the unimolecular decomposition of excited molecular species near threshold, Max Wolfsberg—1072

Secondary reactions in the ion chamber of a mass spectrometer, P. Marmet and J. D. Morrison—1238

Studies of the shapes of ionization efficiency curves of multiply charged monatomic ions. I. Instrumentation and relative electronic transition probabilities for krypton and xenon ions, Robert W. Kiser—2964

Studies of the vapors of the system Au—Cr and Au—Pd by mass spectrometry, Marcel Ackerman, Fred E. Stafford, and Georges Verhaegen—1560

Thermal decomposition of gaseous dimethylnitramine, John M. Flournoy—1106(L)

Thermal decomposition of gaseous 2,2-dinitropropane, John M. Flournoy—1107(L)

Mechanics, Quantum

Analysis of valence-bond wave functions for LiH, J. C. Browne—1814

Angular dependence of the first-order transition density and spin density for many-electron atoms, Werner A. Bingel—2842

Application of Rayleigh–Schrödinger perturbation theory to the hydrogen atom, B. F. Gray—1801

Approximate Hartree–Fock calculations for the hydrogen fluoride molecule, R. K. Nesbet—151

Approximate radial functions for first-row transition-metal atoms and ions. I. Inner-shell, 3*d* and 4*s* atomic orbitals, James W. Richardson, W. C. Nieuwpoort, R. R. Powell, and W. F. Edgell—1057

Assignment of electronic transitions in azo dye prototypes, Melvin B. Robin and William T. Simpson—580

Calculation of atomic valence state energies of B^-, C, and N^+ in BH_n^-, CH_n and NH_n^+, $n=1$ to 4, Frank O. Ellison—3107

Calculation of electron-coupled nuclear spin–spin interactions in molecules by a variational procedure, D. E. O'Reilly—742

Calculation of NMR chemical shifts, D. E. O'Reilly—855

Calculation of nuclear magnetic shielding in hydrogen molecule, S. K. Ghosh and S. K. Sinna—737

Calculation of *p*-band positions of aromatic polycyclic hydrocarbons by limited configuration interaction method, J. Koutecký, J. Paldus, and R. Zahradník—3129

Charge distribution in negative ions and the electron affinities of conjugated hydrocarbons, J. R. Hoyland and Lionel Goodman—21

Charge distributions in positive ions and ionization energies of conjugated hydrocarbons, J. R. Hoyland and Lionel Goodman—12

Comparison of localized and delocalized models for $n\rightarrow\pi^*$ transitions: A possible interpretation of the observed symtetrazine fluorescence, M. Ashraf El-Bayoumi and David R. Kearns—2516(L)

Computation on the ground state wave function for the C_2N_2 molecule, E. Clementi and A. D. McLean—563(L)

Configuration interaction study of the lithium hydride molecule, Darrell D. Ebbing—1361

Criteria for the construction of good self-consistent-field molecular orbital wave functions, and the significance of LCAO MO population analysis, R. S. Mulliken—3428

Critique of the method of the split *p*-orbital, J. S. Griffith—1689(L)

De-excitation of molecular vibration by collision, Ernest Bauer and F. W. Cummings—618

Determination of the assignment of triplet states in catacondensed aromatic hydrocarbons, David R. Kearns—1608

Distortion of atomic orbitals in molecular orbitals. I. Polarization of the hydrogen atom in H_2^+, M. Geller, A. A. Frost, and P. G. Lykos—2693

Double-minimum potentials in hydrogen bonded solids, R. L. Somorjai and D. F. Hornig—1980

Dynamic aspects of bond alteration in cyclic polyenes, Martin Gouterman and Georges Wagnière—1188

Effects of helium buffer gas atoms on the atomic hydrogen hyperfine frequency, George A. Clarke—2211

Electron conduction in charge-transfer molecular crystals, E. Menefee and Yoh-Han Pao—3472

Electron distribution in the C—Cl bonds of CH_2Cl_2 and derivation of matrix elements off-diagonal in *J* for two quadrupolar nuclei in an asymmetric rotor, W. H. Flygare and William D. Gwinn—787

Electron distributions in small molecules, E. Clementi and H. Clementi—2824

Electronic energy of HF as a power series in the internuclear distance, Charles E. Reid—1263

Electronic spectra of naphthols, Kichisuke Nishimoto and Ryoichi Fujishiro—3494(L)

Electrostatic energy matrices of the f^7 configuration, W. A. Runciman—1481

Equivalence of Rydberg–Klein–Rees and simplified Dunham potentials, A. C. Hurley—1117(L)

Deuteron quadrupole coupling in diatomic "hydrides," H. J. Kolker and M. Karplus—960
Microwave spectrum, structure, quadrupole coupling constants, and barrier to internal rotation of chloromethylsilane, R. H. Schwendeman and G. D. Jacobs—1251
Microwave spectrum, structure, quadrupole interaction, dipole moment, and bent C—Cl bonds in 1,1-dichlorocyclopropane, W. H. Flygare, A. Narath, and William D. Gwinn—200
Nuclear magnetic resonance spectrum of B^{11} in lesserite, K. S. Pennington and H. E. Petch—2151
Nuclear quadrupole coupling tensors for Na^{23} and Al^{27} in natrolite, a fibrous zeolite, H. E. Petch and K. S. Pennington—1216
Nuclear quadrupole resonance of As^{75} in $Na_2HAsO_4 \cdot 7H_2O$, Eric D. Jones and Edwin A. Uehling—1690(L)
Nuclear quadrupole resonance of N^{14} in solid N_2, T. A. Scott—1459
Quadrupolar study of barium in barium bromide dihydrate by proton magnetic resonance, J. W. McGrath and A. A. Silvidi—1496

Nuclear Resonance (see Magnetic Resonance)

Nucleation

Homogeneous nucleation in a miscibility gap system. A critical test of nucleation theory, B. E. Sundquist and R. A. Oriani—2604
Kinetics of condensation of water vapor, Welby G. Courtney—2018
Non-steady-state nucleation, Welby G. Courtney—2009
Nucleation of zinc on glass, John B. Hudson—887
Reconsiderations of nucleation theory, Jens Lothe and G. M. Pound—2080

Phase Transitions

Cylindrical approximation and the α–β quartz transition, A. J. Hughes and A. W. Lawson—2098
PbSe composition stability limits, R. F. Brebrick and E. Gubner—170
Second transition in solid CH_4, J. H. Colwell, E. K. Gill, and J. A. Morrison—2223(L)
Thermodynamic properties of trifluorophosphine from 12°K to its boiling point. Entropy from molecular and spectroscopic data, E. L. Pace and R. V. Petrella—2991
X-ray study of phase transformations in some rare-earth oxide systems, R. L. Mozzi and O. J. Guentert—298

Phosphors

Molecular orbital model for alkali halide phosphors activated by heavy metals, Satoru Sugano—122
Paramagnetic resonance of some benzophenone derivatives in their phosphorescent state, L. H. Piette, J. H. Sharp, T. Kuwana, and J. N. Pitts, Jr.—3094(L)
Radiationless transitions and radiative lifetime of $^3B_{1u}$ state of benzene, E. C. Lim—3497(L)

Photochemistry

An analysis of paramagnetic resonance properties of pure and bleached *F* centers in potassium chloride, Gordon A. Noble and Jordan J. Markham—1340
Chemical processes subsequent to n-π^* and π-π^* transitions of pyridine *N*-oxide and 2-picoline *N*-oxide, Norisuke Hata and Ikuzo Tanaka—2072
Identity of chemical and photochemical species from gamma (2,4-dinitrobenzyl) pyridine, R. Hardwick and Harry S. Mosher—1402(L)
Infrared study of the reaction of CH_2 with CO_2 in the solid state, Dolphus E. Milligan and Marilyn E. Jacox—2911
Kinetics of excited molecules. IV. Unimolecular dissociation of ketene, Gladstone A. Taylor and Gerald B. Porter—1353
Photochemical decomposition of ozone in yellow-red light and the mechanism of its thermal decomposition, E. Castellano and H. J. Schumacher—2238(L)

Photochemical primary process in biacetyl vapor at 4358 A. W. Albert Noyes, Jr., W. A. Mulac, and Max S. Matheson—880
Photo-ionization of alkyl free radicals, Fred A. Elder, Clayton Giese, Bruce Steiner, and Mark G. Inghram–3292
Photoionization of nitric oxide, John P. Doering and Bruce H. Mahan—669
Photolysis of acetone in the presence of HI and the decomposition of the acetyl radical, Edward O'Neal and Sidney W. Benson—2196
Photolysis of mixtures of cyclobutane and acetone-d_6. Reactions of cyclobutyl radical, Alvin S. Gordon, S. Ruven Smith, and Charles M. Drew—824
Photolysis of nitrous oxide. II. 1470 and 1830 A, John P. Doering and Bruce H. Mahan—1682
Photosensitized reaction between hydrogen (^3P) atoms and molecular nitrogen, Ikuzo Tanaka and J. R. McNesby—3170
Pulse radiolysis studies. I. Transient spectra and reaction rate constants in irradiated aqueous solutions of benzene, Leon M. Dorfman, I. A. Taub, and R. E. Bühler—3051
Quenching of the phosphorescence and primary dissociation of biacetyl vapor at 4358 A and high temperature David, S. Weir—1113(L)
Radiolysis of ethane-1,1,1-*d*:, Louis J. Stief and P. Ausloos—2904
Some photochemical reactions of O_3 in the gas phase, D. Katakis and H. Taube—416
Ultraviolet spectra of stilbene *p*-monohalogen stilbenes and azobenzene and the *trans* to *cis* photoisomerization process, Rudolph H. Dyck and Donald S. McClure—2326
Unimolecular decomposition of vibrationally excited ethane and ethyl radicals, Carl A. Heller and Alvin S. Gordon—2648
Vacuum ultraviolet photochemistry. II. Photolysis of ethylene, H. Okabe and J. R. McNesby—601
Vacuum ultraviolet photochemistry. III. Primary processes in the vacuum ultraviolet photolysis of water and ammonia, J. R. McNesby, Ikuzo Tanaka, and H. Okabe—605
Vacuum uv photolysis of solid ethane at 77°K, Milton D. Scheer, James McNesby, and Ralph Klein—3504(L)

Photoconductivity

Charge injection into organic crystals: Influence of electrodes on dark- and photoconductivity, Martin Pope, Hartmut P. Kallmann, Augustine Chen, and Peter Gordon—2486
On the nature of the electrode effects in the conductivity of anthracene monocrystals, P. J. Reucroft—1114(L)
Photocarrier generation in anthracene, D. C. Hoesterey—557(L)

Photoionization

Absorption and photoionization coefficients of propylene and butene-1 in the vacuum ultraviolet, J. A. R. Samson, F. F. Marmo, and K. Watanabe—783

Polymers

Chain model for polyelectrolytes. VII. Potentiometric titration and ion binding in solutions of linear polyelectrolytes, Leonard Kotin and Mitsuru Nagasawa—873
Concentration dependence of the frictional coefficient of polymers in solution, Hiromi Yamakawa–2995
Contribution to a liquid-like theory of rubber elasticity, Edmund A. DiMarzio—1563
Copolymerization mathematics and the description of stereoregular polymers, Fraser P. Price—209
Critical opalescence of polystyrene in cyclohexane transmission measurements, P. Debye, D. Woermann, and B. Chu—851
Cubic lattice model chain, W. R. Krigbaum and M. Kaneko—99
Effect of styrene monomer on the fluorescence properties of polystyrene, Louis J. Basile—2204
Erratum: Normal vibrations of the polymer molecules of helical configuration. II. A simple method of factoring of the secular equation [J. Chem. Phys. **35,** 1050 (1961)], Hiroyuki Tadokoro—1948(L)
Erratum: Ring closure in a macromolecule [J. Chem. Phys. **34,** 1531 (1961)], B. J. Hiley and M. F. Sykes—2808(L)
Influence of the excluded-volume effect on the average square length of a normal alkane-type chain. J. Hijmans and Th. Holleman—4
Initial stages of the chlorine atom induced polymerization of acetylene, M. H. J. Wijnen—1672
Matrix formulation of copolymerization statistics, Leonard Peller–2976
Method for determining conformations of polymer molecules in crystalline state from fiber identity distances, Kazuo Nagai and Masamichi Kobayashi—1268
Molecular conformation in oriented fibers, A. V. Tobolsky and V. D. Gupta–430
Molecular dimensions in crystalline polymers, A. V. Tobolsky and V. D. Gupta—1999
Monte Carlo calculations on the dynamics of polymers in dilute solution, Peter H. Verdier and W. H. Stockmayer—227
Multicomponent polyelectrolyte solutions. I. Thermodynamic equations for light-scattering and sedimentation, Henryk Eisenberg—1837
Multicomponent polyelectrolyte solutions. II. Excluded volume study of polyvinylsulfonate alkali halide systems, Henryk Eisenberg and Daniel Woodside—1844
Nuclear magnetic resonance study of collagen hydration, Herman J. C. Berendsen—3297
On the self-diffusion of ions in a polyelectrolyte solution, Shneior Lifson and Julius L. Jackson—2410
Partition function of bulk polymers. I, F. W. Boggs—1733
Preferential adsorption by polymers dissolved in solvent mixture, Tsuneo Yoshino and Hiroshi Tanzawa—2382
Radius of gyration of polymer chains, Marshall Fixman—306
Radius of gyration of polymer chains. II. Segment density and excluded volume effects, Marshall Fixman—3123
Relation between ESR spectra and molecular orientation in irradiated polyethylene, Michio Kashiwagi—575
Second virial coefficients of polyelectrolytes. I, Norio Ise—3248
Unperturbed dimensions of linear atactic polymers, Sung J. Yoo and Jack B. Kinsinger—1371

Proteins

Electrical conductivity of proteins. II. Semiconduction in crystalline bovine hemoglobin, Barnett Rosenberg—816

Quadrupole Resonance (see **Nuclear Quadrupole Resonance**)

Quantum Mechanics (see **Mechanics, Quantum**)

Radiation Chemistry

Absolute rate constant for the reaction of hydroxyl radicals with benzene in water, Leon M. Dorfman, R. E. Bühler, and I. A. Taub—549(L)

Charge states of molecular fragments from CCl_3Br following nuclear decay of Br^{80m} and Br^{82}, S. Wexler—1992

Decomposition of excited alkyl radicals in the liquid phase, Edward K. C. Lee and F. S. Rowland—554(L)

Diffusion kinetics in radiation chemistry. I. Generalized formulation and criticism of diffusion model, Aron Kuppermann and Geneva G. Belford—1412

Diffusion kinetics in radiation chemistry. II. One-radical-one-solute model; calculations, Aron Kuppermann and Geneva G. Belford—1427

Disappearance of trapped hydrogen atoms in gamma-irradiated ice, John M. Flournoy, Lillian H. Baum and Seymour Siegel —2229(L)

Electron spin resonance in a gamma-irradiated single crystal of diglycolic acid monohydrate, Yukio Kurita—560(L)

Electron spin resonance of an irradiated single crystal of deuterated DL-tartaric acid, D.V.G.L. Narasimha Rao and Walter Gordy—1143

Electron spin resonance of irradiated ethyl bromide, F. W. Mitchell, B. C. Green and J. W. T. Spinks—1095(L)

ESR studies on the formation of sulfur-radicals in irradiated cysteine, glutathione, and djenkolic acid, Thormod Henriksen —1258

Electron spin resonance study of γ-irradiated single crystals of *dl*-isovaline, Thadho S. Jaseja and Roy S. Anderson—1098(L)

Electron spin resonance study of radiation damage in single crystals of *dl*-aspartic acid, Thadho S. Jaseja and Roy S. Anderson—2727

Energy transfer in irradiated alkyl disulfide, Frank K. Truby —2227(L)

Erratum: Time dependence of the statistical molecular weight distribution of the polymer resulting from vinyl polymerization [J. Chem. Phys. **35,** 630 (1961)], V. S. Nanda and R. K. Pathria—1688(L)

Failure to bond rupture and nuclear recoil following (n,γ) activation, Adon A. Gordus and Chi-hua Hsiung—954

Fluorescence energy transfer and oxygen quenching in solutions of diphenyloxazole in cyclohexane, Arye Weinreb—890

Free radicals in irradiated nylon, Y. Shinohara and D. Ballantine—3042

Gas phase radiolysis of propane, P. Ausloos and S. Lias—3163

Hydrogen formation in the γ radiolysis of ethylene, P. Ausloos and R. Gorden, Jr.—5

Hyperfine interactions in x-irradiated magnesium phosphite hexahydrate, Melvin W. Hanna and Larry J. Altman—1788

Interaction of 0.2- to 4.0-ev electron beams with cleaved MgO, C. J. Cook and W. J. Fredericks—608

Ionic complexes of Xe and C_2H_2 produced by the radiolysis of these gases, P. S. Rudolph, S. C. Lind, and C. E. Melton—1031

Pulse radiolysis studies. I. Transient spectra and reaction rate constants in irradiated aqueous solutions of benzene, Leon M. Dorfman, I. A. Taub, and R. E. Bühler—3051

Radiolysis of methylcyclohexane. I. Liquid phase, G. R. Freeman—1534

Radiolysis of methylcyclohexane. II. Liquid phase inhibition by benzene, G. R. Freeman—1542

Relation between ESR spectra and molecular orientation in irradiated polyethylene, Michio Kashiwagi—575

Spin exchange between excitons and free radicals, H. M. McConnell, H. O. Griffith, and D. Pooley—2518(L)

Thermoluminescence from gamma-irradiated biochemicals. Investigation of emission spectra, C. J. Weinberg, D. R. Nelson, J. G. Carter, and L. G. Augenstine—2869

Radiochemistry

Decomposition of $(CH_3Xe^{131})^+$ following the nuclear decay of CH_3I^{131}, T. A. Carlson and R. M. White—2883

Positron annihilation in some organic compounds, D. P. Kerr and B. G. Hogg—2109

Radiolysis of ethane-1,1,1-d_3, Louis J. Stief and P. Ausloos—2904

Reactions of high-energy, excited I^{128} ions with gaseous molecules, Edward P. Rack and Adon A. Gordus—287

Raman Spectra

Absolute Raman intensities. I. Method for molecules in the gas phase, David M. Golden and Bryce Crawford, Jr.—1654

Interpretation of the ultraviolet spectrum of oxalyl chloride, B. D. Saksena and G. S. Jauhri—2233(L)

Potassium and rubidium Raman lamps, Norman S. Ham and A. Walsh—1096(L)

Raman spectral studies of aqueous solutions of selenious acid, G. E. Walrafen—90

Raman spectral studies of the effects of electrolytes on water, George E. Walrafen—1035

Vibrational spectra of MoF_6 and TcF_6, Howard H. Claassen, Henry Selig, and John G. Malm—2888

Vibrational spectra of ReF_6, Howard H. Claassen, John G. Malm, and Henry Selig—2890

Reaction Rates (see Kinetics of Reaction)

Refractive Indexes

On the determination of absolute intensities from refractive index data, Shiro Maeda and P. N. Schatz—571(L)

Rotation

Centrifugal distortion of bond distances and bond angles, Machio Iwasaki and Kenneth Hedberg—2961

Electron spin resonance of irradiated single crystals of alanines: Hindered rotation of the methyl group in a free radical, Ichiro Miyagawa and Koichi Itoh—2157

Higher-order rotation-vibration energies of polyatomic molecules. V, Gilbert Amat and Harald H. Nielsen—1859

Microwave spectrum, structure, quadrupole coupling constants, and barrier to internal rotation of chloromethylsilane, R. H. Schwendeman and G. D. Jacobs—1251

Molecular rotation in rare-gas crystals, Robert L. Armstrong—2429

Nuclear magnetic resonance in hexamethylbenzene at low temperatures, Z. M. El Saffar—1093(L)

Rotational energy levels of a linear triatomic molecule in a $^2\Pi$ electronic state, Jon. T. Hougen—519

Studies of hydrogen peroxide: The infrared spectrum and the internal rotation problem, R. L. Redington, W. B. Olson, and P. C. Cross—1311

3,3-dimethyl-2-thiabutane: Chemical thermodynamic properties and barriers to internal rotation, D. W. Scott, W. D. Good, S. S. Todd, J. F. Messerly, W. T. Berg, I. A. Hossenlopp, J. L. Lacina, Ann Osborn, and J. P. McCullough—406

Scattering

Attachment of low-energy electrons to oxygen, D. C. Conway —2549
Binding energy of Ar_3^+ from ion scattering data, Robert D. Cloney, Edward A. Mason, and Joseph T. Vanderslice—1103(L)
Critical opalescence of polystyrene in cyclohexane transmission measurements, P. Debye, D. Woermann, and B. Chu—851
Dissociation of gaseous diatomic molecules classical adiabatic scattering approach, John C. Light—1016
Excitation of molecular vibration by slow electron impact, J. C. Y. Chen and J. L. Magee—1407
Inelastic scattering from atoms at medium energies. I. Bound states, Russell A. Bonham—3260
Interaction energies from scattering cross sections of hydrogen ions in CH_4, CF_4, C_2H_6, and C_2F_6, Robert D. Cloney and Joseph T. Vanderslice—1866
Redetermination of the He–He interaction between 0.55 and 1.0 A, I. Amdur and R. R. Bertrand—1078(L)

Semiconductors

Charge injection into organic crystals: Influence of electrodes on dark- and photoconductivity, Martin Pope, Hartmut P. Kallmann, Augustine Chen, and Peter Gordon—2486
Composition stability limits of PbTe, II, R. F. Brebrick and E. Gubner—1283
Electrical conductivity of proteins. II. Semiconduction in crystalline bovine hemoglobin, Barnett Rosenberg—816
Electrical properties of chlorpromazine, F. Gutmann and A. Netschey—2355
Preparation of semiconducting cubic boron nitride, R. H. Wentorf, Jr.—1990
Preparation of semiconducting diamonds, R. H. Wentorf, Jr. and H. P. Bovenkerk—1987
Semiconductive properties of tetracyanoethylene complexes and their absorption spectra, H. Kuroda, M. Kobayashi, M. Kinoshita, and S. Takemoto—457
Semiconductivity of naphthalene, John A. Bornmann—1691(L)
Theory of hole injection and conductivity in organic materials, Hartmut P. Kallmann and Martin Pope—2482
Tunneling model for electron transport and its temperature dependence in crystals of low carrier mobility. Example: anthracene, R. A. Keller and H. E. Rast, Jr.—2640

Shock Waves (see also Detonation)

Detonation sensitivity and failure diameter in homogeneous condensed materials, Marjorie W. Evans—193
Dissociation energy and rate of decomposition of C_2N_2, Wing Tsang, S. H. Bauer, and M. Cowperthwaite—1768
Dissociation of halogens in shock waves, Hiroyuki Hiraoka and R. Hardwick—1715
Dissociation rates of deuterium, John P. Rink—1398(L)
Emission of vacuum ultraviolet radiation from the acetylene–oxygen and the methane–oxygen reactions in shock waves, G. B. Kistiakowsky and L. Willard Richards—1707
Hydrogen–deuterium kinetic isotope effect at very high temperature, Harold S. Johnston and Eugene Tschuikow-Roux —463
Infrared absorption by carbon monoxide at high temperature, William O. Davies—292
Kinetic study of the formation and reaction of CN molecules in shock waves, W. L. Patterson, Jr. and E. F. Greene—1146
Measurement of the dissociation rates of hydrogen and deuterium, Emmett A. Sutton—2923
Shock tube determination of dissociation rates of hydrogen, John P. Rink—262
Shock-tube measurement of dissociation rates of hydrogen, Richard W. Patch—1919
Shock-tube study of the kinetics of nitric oxide at high temperatures, Kurt L. Wray and J. Derek Teare—2582
Shock-tube study of the vibrational relaxation of nitric oxide, Kurt L. Wray—2597
Some studies on argon, helium, and carbon dioxide with an integrated-schlieren instrumented shock tube, Jerome Daen and P. C. T. de Boer—1222
Thermal decomposition of nitryl chloride in shock waves, Hiroyuki Hiraoka and R. Hardwick—2164

Solutions (see also Liquids)

Apparent molar volumes of salts and metals in liquid ammonia at 0°, Stuart R. Gunn and LeRoy G. Green—363
Calorimetry in liquid thallium nitrate–alkali nitrate mixtures, O. J. Kleppa and L. S. Hersh—544
Chain model for polyelectrolytes. VII. Potentiometric titration and ion binding in solutions of linear polyelectrolytes, Leonard Kotin and Mitsuru Nagasawa—873
Cluster theory of saturated vapor of helium isotope mixtures, Richard O. Adams, William Band, Glenn R. Ingram, and Clay L. Perry—1703
Concentration dependence of the frictional coefficient of polymers in solution, Hiromi Yamakawa—2995
Critical opalescence of binary liquid mixtures: Methanol–cyclohexane; Aniline–cyclohexane, P. Debye, B. Chu, and H. Kaufman—3378
Electron paramagnetic relaxation in ionic solutions, Ralph G. Pearson and Tomas Buch—1277
Electron spin resonance of semiquinones in aprotic solvents, Ellery W. Stone and August H. Maki—1944(L)
Heats of solution of alkali metals in liquid ammonia at 25°, Stuart R. Gunn and LeRoy G. Green—368
Multicomponent polyelectrolyte solutions. Part I. Thermodynamic equations for light scattering and sedimentation, Henryk Eisenberg—1837
Multicomponent polyelectrolyte solutions. Part II. Excluded volume study of polyvinylsulfonate alkali halide systems, Henryk Eisenberg and Daniel Woodside—1844
On the thermodynamics of solutions. VII. Critical properties of mixtures, O. Redlich and A. T. Kister—2002
Nuclear magnetic resonance effects in aqueous solutions of 1-1 electrolytes, J. C. Hindman—1000
Oxygen-17 NMR shifts in aqueous solutions of rare-earth ions, W. Burton Lewis, Jasper A. Jackson, Joe Fred Lemons, and Henry Taube—694
Raman spectral studies of aqueous solutions of selenious acid, G. E. Walrafen—90
Raman spectral studies of the effects of electrolytes on water, George E. Walrafen—1035
Structure of water and hydrophobic bonding in proteins. II. A model for the thermodynamic properties of aqueous solutions of hydrocarbons, George Némethy and Harold A. Scheraga —3401
Symmetry of configurational entropy in lattice statistics, W. H. Kleiner—76
Theory of multicomponent fluid mixtures. III. A pseudo pair potential, Zevi W. Salsburg—1974

Theory of the heats of mixing of certain fused salts, Howard Reiss, J. L. Katz, and O. J. Kleppa—144
Thermodynamic properties of hydrogen in benzene solutions, J. F. Connolly—2897
Van der Waals energy changes in the mixing of molten salts, M. Blander—1092(L)

Spectra (see Absorption Spectra, Emission Spectra Fluorescence, Raman Spectra)

Statistical Mechanics (see Mechanics, Statistical)

Surface Phenomena

Adsorption of gases on quartz single crystals, L. J. Slutsky and W. H. Wade—2688
Dielectric behavior of water adsorbed on alumina, Mart G. Baldwin and J. C. Morrow—1591
Dielectric relaxation of water adsorbed on γ-alumina, Klaus Dransfeld, H. L. Frisch, and E. A. Wood—1574
Direct observations of individual adatoms: Nitrogen on tungsten, Gert Ehrlich and F. G. Hudda—3233
Effect of adsorbed phases on the electrical conductivity of synthetic crystalline zeolites, Dennis N. Stamires—3174
Effect of adsorption of acoustic boundary-layer losses, J. G. Parker—1547
Effect of chemisorbed nitrogen on the work function of tungsten, M. P. Hill and B. A. Pethica—3095(L)
Effect of film thickness and substrate on the absorption spectrum of solid lead chloride, W. P. Doyle and D. B. Pearson—1950(L)
Effect of particle size on low-temperature heat capacities, Andrew C. Victor—2812(L)
Electronic spectrum of adsorbed benzene, A. Ron, M. Folman, and O. Schnepp—2449
Energy parameters in adsorption, Gert Ehrlich—1499
Erratum: Low-temperature chemisorption. III. Studies in the field emission microscope [J. Chem. Phys. **35,** 1421 (1961)], Gert Ehrlich and F. G. Hudda—1088(L)
Erratum: Vibrational spectra of inorganic molecules. II. Infrared reflection spectra of liquid lithium, sodium, potassium and silver nitrates [J. Chem. Phys. **35,** 1078 (1961)], J. K. Wilmshurst and S. Senderoff—1088(L)
Gas adsorption near the bulk critical temperature, G. D. Halsey, Jr.—1688(L)
Hydrostatics in various gravitational fields, Ta Li—2369
Infrared absorption of zinc oxide and of adsorbed CO_2. II, Sanjuro Matsushita and Toshiko Nakata—665
Infrared spectrum of CO chemisorbed on iron, George Blyholder—2036
Interaction of helium, neon, argon, and krypton with a clean platinum surface, H. Chon, R. A. Fisher, R. D. McCammon, and J. G. Aston—1378
Nitrogen on nickel surfaces, L. H. Germer and A. U. MacRae—1555
Preferential adsorption by polymers dissolved in solvent mixture, Tsuneo Yoshino and Hiroshi Tanzawa—2382
Rotation of physically adsorbed CO, George Blyholder and Laurence Neff—3503(L)
Structure and surface binding. N and CO on tungsten, Gert Ehrlich—1171
Study of the adsorption of hydrogen, ethane, ethylene and acetylene on iridium by field emission microscopy, John R. Arthur, Jr., and Robert S. Hansen—2062
Surface ionization energies of organic compounds: Phthalocyanines, Martin Pope—2810(L)
Third- and fourth-order interactions of argon with a graphitized carbon black, J. R. Sams, Jr., G. Constabaris, and G. D. Halsey, Jr.—1334
Verification of the inverse cube law in physical adsorption, Robert A. Pierotti—2515(L)

Thermal Conductivity

Calculations of the coefficient of thermal conductivity for dissociating hydrogen, David G. Clifton—472
Heat conductivity of polyatomic and polar gases, E. A. Mason and L. Monchick—1622
Measurement of the thermal conductivity of singly and doubly dissociating nitrogen peroxide, A. K. Barua and P. K. Chakraborti—2817
Regarding the effects of relaxation rate on heat conduction in gases, Richard S. Brokaw—2517(L)

Thermal Diffusion

Gouy diffractometry in thermal diffusion, James A. Bierlein—2793
Theory of thermal diffusion in dilute alloys, R. E. Howard and J. R. Manning—910
Thermal diffusion column shape factors for a gas composed of rigid spherical molecules, S. Raman and S. C. Saxena—3345
Thermodynamic significance of heat of transport in interstitial solid solutions, D. O. Raleigh and A. W. Sommer—381

Thermodynamic Properties

Apparent molar volumes of salts and metals in liquid ammonia at 0°, Stuart R. Gunn and LeRoy G. Green—363
Calorimetry in liquid thallium nitrate-alkali nitrate mixtures, O. J. Kleppa and L. S. Hersh—544
Cluster theory of saturated vapor of helium isotope mixtures, Richard O. Adams, William Band, Glenn R. Ingram, and Clay L. Perry—1703
Composition stability limits of PbTe. II, R. F. Brebrick and E. Gubner—1283
Compression and phase transitions of solid HCl, HBr, SiH_4, and SF_6, John W. Stewart—400
Dissociation energy and rate of decomposition of C_2N_2, Wing Tsang, S. H. Bauer, and M. Cowperthwaite—1768
Dissociation pressure of uranium dicarbide, James M. Leitnaker and Willard G. Witteman—1445
Double-oven experiments with lithium halide vapors, J. Berkowitz, H. A. Tasman, and W. A. Chupka—2170
Effect of channel length on the force exerted by effusing vapors, David A. Schulz and Alan W. Searcy—3099(L)
Effect of oxygen upon the heat capacity of gadolinium between 1.3 and 5°K, L. T. Crane—10
Effect of particle size on low-temperature heat capacities, Andrew C. Victor—2812(L)
Electrical properties of chlorpromazine, F. Gutmann and A. Netschey—2355
Electron impact study of CO using a Lozier apparatus, Morton A. Fineman and Americo W. Petrocelli—25
Enthalpy of formation of oxygen vacancies in barium oxide, H. Holloway—2820
Entropies, heats of sublimation, and dissociation energies of the cesium halides, Milton D. Scheer and Joseph Fine—1647

Entropy and related thermodynamic properties of propionitrile, Lloyd A. Weber and John E. Kilpatrick—829
Equilibrium composition of the C/H system at elevated temperatures, Russell E. Duff and S. H. Bauer—1754
Erratum: Addendum to some thermal data for Bi_2Te_3 [J. Chem. Phys. **33**, 305 (1960)], G. F. Bolling—1085(L)
Erratum: Thermodynamic properties of unipositive gaseous elemental ions [J. Chem. Phys. **33**, 35 (1960)], J. W. Green, D. E. Poland, and J. L. Margrave—1088(L)
Estimation of molecular parameters of C/H fragments, M. Cowperthwaite and S. H. Bauer—1743
Experimental determination of the heat of dissociation of $N_2O_4 \rightarrow 2NO_2$ from the temperature dependence of absolute infrared intensities, A. Guttman and S. S. Penner—98
Extrapolation of the orthorhombic *n*-paraffin melting properties to very long chain lengths, Martin G. Broadhurst—2578
Heat capacities and thermodynamic functions of YH_2 and YD_2 from 5° to 350°K and the hydrogen vibration frequencies, Howard E. Flotow, Darrell W. Osborne, and Klaus Otto—866
Heat capacities and thermodynamic properties of two tetramethylammonium halides, Shu-Sing Chang and Edgar F. Westrum, Jr.—2420
Heat capacity and entropy of $CoCl_2$ and $MnCl_2$ from 11° to 300°K. Thermal anomaly associated with antiferromagnetic ordering in $CoCl_2$, R. C. Chisholm and J. W. Stout—972
Heat capacity and entropy of $CuCl_2$ and $CrCl_2$ from 11° to 300°K. Magnetic ordering in linear chain crystals, J. W. Stout and R. C. Chisholm—979
Heat capacity of critical mixtures, Marshall Fixman—1957
Heat capacity of diamond at high temperatures, Andrew C. Victor—1903
Heat of formation of BOF, M. Farber—1101(L)
Heat of formation of deuterated diborane, Stuart R. Gunn and LeRoy G. Green—1118(L)
Heat of formation of the CN radical, J. Berkowitz—2533
Heat of sublimation and dissociation energy of gaseous C_2, Leo Brewer, W. T. Hicks, and O. H. Krikorian—182
Heats of solution of alkali metals in liquid ammonia at 25°, Stuart R. Gunn and LeRoy G. Green—368
High-temperature evaporation and thermodynamic properties of zirconium diboride, James M. Leitnaker, Melvin G. Bowman, and Paul W. Gilles—350
Hydrogen-bonding self-association of pyrrolidine in CCl_4, Robert H. Linnell, Marlene Aldo, and Fredrick Raab—1401(L)
Infrared spectrum and thermodynamic properties of gaseous sulfur trioxide, R. W. Lovejoy, J. H. Colwell, D. F. Eggers, Jr., and G. D. Halsey, Jr.—612
Mass spectrometric study of the gaseous molecules above AgSn, AuSn, and CuSn alloys, Marcel Ackerman, Jean Drowart, Fred E. Stafford, and Georges Verhaegen—1557
Metallic cohesion and vibration spectrum of copper, B. Dayal and B. B. Tripathi—3002
PbSe composition stability limits, R. F. Brebrick and E. Gubner—170
Residual entropy of sulfuryl fluoride at 0°K, F. J. Bockhoff and E. L. Pace—3502(L)
Second transition in solid CH_4, J. H. Colwell, E. K. Gill, and J. A. Morrison—2223(L)
Second virial coefficients of argon, krypton, and argon–krypton mixtures at low temperatures, B. E. F. Fender and G. D. Halsey, Jr.—1881
Structure of water and hydrophobic bonding in proteins. I. A model for the thermodynamic properties of liquid water, George Némethy and Harold A. Scheraga—3382
Structure of water and hydrophobic bonding in proteins. II. A model for the thermodynamic properties of aqueous solutions of hydrocarbons, George Némethy and Harold A. Scheraga—3401
Studies of the vapors of the system Au–Cr and Au–Pd by mass spectrometry, Marcel Ackerman, Fred E. Stafford, and Georges Verhaegen—1560
Theory of the anomalous heat capacity in solid hydrogen and deuterium at low *o*-hydrogen and *p*-deuterium concentration, William H. Orttung—652
Theory of the heats of mixing of certain fused salts, Howard Reiss, J. L. Katz, and O. J. Kleppa—144
Thermal properties based upon heat capacity and decomposition pressure of tetramethylammonium hydrogen dichloride. The nature of the hydrogen bond in the $[Cl\text{-}H\text{-}Cl]^-$ ion, Shu-Sing Chang and Edgar F. Westrum, Jr.—2571
Thermodynamic functions at liquid–vapor transition range of the van der Waals, the Berthelot, and the Dieterici equations of state, Francis H. Ree—3373
Thermodynamic properties of hydrogen in benzene solutions, J. F. Connolly—2897
Thermodynamic properties of trifluorophosphine from 12°K to its boiling point. Entropy from molecular and spectroscopic data, E. L. Pace and R. V. Petrella—2991
Thermodynamics of iodine addition so ethylene, propylene, and cyclopropane, Sidney W. Benson and Akira Amano—3464
Thermodynamics of the formation and migration of defects in cuprous oxide, Michael O'Keeffe and Walter J. Moore—3009
3,3-dimethyl-2-thiabutane: Chemical thermodynamic properties and barriers to internal rotation, D. W. Scott, W. D. Good, S. S. Todd, J. F. Messerly, W. T. Berg, I. A. Hossenlopp, J. L. Lacina, Ann Osborn, and J. P. McCullough—406
Vapor pressures of scandium, yttrium, and lanthanum, R. J. Ackermann and E. G. Rauh—448
Vibrational spectra of MoF_6 and TcF_6, Howard H. Claassen, Henry Selig, and John G. Malm—2888
Vibrational spectra of ReF_6, Howard H. Claassen, John G. Malm, and Henry Selig—2890

Thermodynamics

Axiomatic treatment of chemical reaction systems, J. Wei—1578
Chemical equilibrium in complex mixtures, Howard B. Levine—3049
Cylindrical approximation and the α–β quartz transition, A. J. Hughes and A. W. Lawson—2098
General reciprocity relation between the rates and affinities of simultaneous chemical reactions, Pierre Van Rysselberghe—1329
Heat of formation and entropy of the trimer of boron oxyfluoride, M. Farber—661
Hydrostatics in various gravitational fields, Ta Li—2369
Kinetics of condensation of water vapor, Welby G. Courtney—2018
Nonequilibrium thermodynamics of the simple moving boundary experiment, Richard J. Bearman—2432
Non-steady-state nucleation, Welby G. Courtney—2009

On the reduction of certain multiplicative chemical equilibrium systems to mathematically equivalent additive systems, George B. Dantzig and James C. DeHaven—2620
On the splitting of entropy production terms into flux and force factors, Pierre van Rysselberghe—1327
On the thermodynamics of solutions. VII. Critical properties of mixtures, O. Redlich and A. T. Kister—2002
On the vapor pressure of electrically charged droplets, Isaiah Gallily and Gedalia Ailam (Volinez)—1781
Reconsiderations of nucleation theory, Jens Lothe and G. M. Pound—2080
Spectrum of C_3, Lew Brewer and John L. Engelke—992
Thermodynamic significance of heat of transport in interstitial solid solutions, D. O. Raleigh and A. W. Sommer—381
Thermodynamics of small systems, Terrell L. Hill—3182

Thermoluminescence

Thermoluminescence from gamma-irradiated biochemicals. Investigation of emission spectra, C. J. Weinberg, D. R. Nelson, J. G. Carter, and L. G. Augenstine—2869
Thermoluminescence of thoria, E. H. Greener, W. M. Hirthe, and E. Angino—1105

Transport Phenomena

Measurement of the thermal conductivity of singly and doubly dissociating nitrogen peroxide, A. K. Barua and P. K. Chakraborti—2817
Nonequilibrium thermodynamics of the simple moving boundary experiment, Richard J. Bearman—2432
On the splitting of entropy production terms into flux and force factors, Pierre Van Rysselberghe—1327
Regarding the effects of relaxation rate on heat conduction in gases, Richard S. Brokaw—2517(L)
Time lag in transport theory, H. L. Frisch—510
Transport properties of polar gas mixtures, E. A. Mason and L. Monchick—2746

Turbidity

Critical opalescence of polystyrene in cyclohexane transmission measurements, P. Debye, D. Woermann, and B. Chu—851

Ultrasonics

Absorption and dispersion of sound in critical mixtures, Marshall Fixman—1961
Absorption of ultrasonic waves in pure methylcyclohexane, M. E. Pedinoff—777
Effect of adsorption on acoustic boundary-layer losses, J. G. Parker—1547
Electric field effect on sound dispersion, J. R. Olson, R. R. Boade, and S. Legvold—2233(L)
Resonance absorption in solid cyclohexane, Robert A. Rasmussen—1821
Sound dispersion in ethane–ethylene mixtures and in haloethane gases, L. M. Valley and Sam Legvold—481
Sound propagation in the critical temperature region of hydrogen chloride, M. A. Breazeale—2530
Ultrasonic absorption in an electrolytic solution with a mixed solvent, S. S. Yun, R. T. Beyer, and M. W. Dill—2737
Vibrational relaxation in carbon monoxide by the spectrophone frequency-response method, W. E. Woodmansee and J. C. Decius—1831

Valence and Chemical Bond

Bond lengthening by lone pairs, Henry A. Bent—1090(L)
Calculation of atomic valence state energies of B^-, C, and N_+ in BH_n^-, CH_n, and NH_n^+, $n=1$ to 4, Frank O. Ellison—3107
Coupled anharmonic vibrations and spectral line broadening, Robert M. Mazo—1893
Critique of the method of the split p-orbital, J. S. Griffith—1689(L)
d-orbital involvement in BrCl and ICl, M. A. Whitehead—3006
Hydrogen-bonding self association of pyrrolidine in CCl_4, Robert H. Linnell, Marlene Aldo, and Fredrick Raab—1401(L)
Infrared studies of nitriles as proton acceptors in hydrogen bond formation, Shashanka S. Mitra—3286
Ligand field splitting of d orbitals in eight coordinated complexes of dodecahedral structure, Milan Randić—2094
New class of potential functions, A. Cohen and C. H. Blanchard—1402(L)
New potential energy function. I. Empirical, William L. Clinton—555(L)
New potential energy function. II. Theoretical, William L. Clinton—556(L)
Origin of the large π-bonding in $KNiF_3$, R. G. Shulman and S. Sugano—3496(L)
Quadricovalent maximum overlap hybrid orbitals, Milan Randić—3278
Semiempirical valence-bond calculation of electronic energies of CH, CH_2, CH_3, and CH_4, Frank O. Ellison—3112
The SPO method; reply to Dr. J. S. Griffith, M. J. S. Dewar—1689(L)
Transition metal binding in DNA solutions, J. Eisinger, R. G. Shulman, and B. M. Szymanski—1721

Viscosity

Concerning relaxation of plane laminar flow, C. A. Hollingsworth and W. T. Granquist—1594
Viscosity of critical mixtures, Marshall Fixman—310
Viscosity of critical mixtures: Dependence on velocity gradient, William Botch and Marshall Fixman—(L)3100

X-Ray Diffraction

Atomic distribution in liquid argon near the triple point, N. S. Gingrich and C. W. Tompson—2398
Constitution and magnetic susceptibilities of vanadium–hydrogen alloys, R. L. Zanowick and W. E. Wallace—2059
Crystal and molecular structure of triethylscarphane, T. N. Margulis and David H. Templeton—2311
Diffraction of x-rays by liquid neon, Dante Stirpe and C. W. Tompson—392
Kronig structure variations in the x-ray K-absorption spectra of a Cu single-crystal, T. A. Boster and J. E. Edwards—3031
Metastable simple cubic structures in gold–tellurium and silver–tellurium alloys, Huey-Lin Luo and William Klement, Jr.—1870
Molecular symmetry of IF_7, L. L. Lohr, Jr. and William N. Lipscomb—2225(L)
Radial distribution of electrons in the ammonia and hydrogen sulfide molecules, K. E. Banyard—1855
X-ray study of phase transformations in some rare-earth oxide systems, R. L. Mozzi and O. J. Guentert—298
